# **Regulator Numbering System**

Inlet pressure is 100 PSIG.
 For other pressures, consult factory.

Spring Type by Preset / Limited Pressure:
For Preset / Limited Pressure 10 to 25 use 30 PSI Spring
For Preset / Limited Pressure 26 to 50 use 60 PSI Spring
For Preset / Limited Pressure 51 to 90 use 125 PSI Spring

If more than one option is desired, arrange them in alphabetical order in positions 6, 7, and 8.

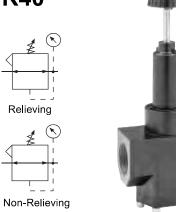

<sup>\*\*</sup> Not available with BSPP thread type.

<sup>†</sup> Must specify preset or limited pressure.

<sup>&</sup>lt;sup>1</sup> Not available on R30.

## Regulator R40

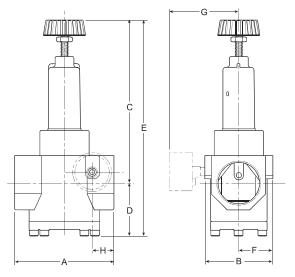

- · Balanced Valve Design
- · Standard Self-Relieving
- Two 1/4 NPT / BSPT-Rc Gauge Ports Standard Can Be Used for Additional Outlet Ports

R40-0B-000

- Piston Operated
- · High Flow Capacity

#### **Materials of Construction**

Body	Zinc
Bonnet	Zinc
Piston	Zinc
Seals	Nitrile
Springs	Steel
Valve Assembly	Brass / Nitrile / Acetal

## **⚠ WARNING**

Product rupture can cause serious injury.
Do not connect regulator to bottled gas.
Do not exceed maximum primary pressure rating.

#### **CAUTION:**

**REGULATOR PRESSURE ADJUSTMENT** – The working range of knob adjustment is designed to permit outlet pressures within their full range. Pressure adjustment beyond this range is also possible because the knob is not a limiting device. This is a common characteristic of most industrial regulators, and limiting devices may be obtained only by special design.

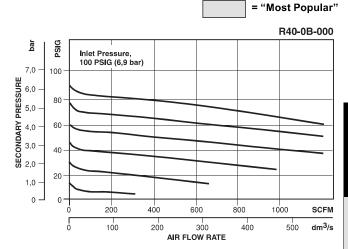

For best performance, regulated pressure should always be set by increasing the pressure up to the desired setting.
