

Aprimatic. Certified Quality.

Aprimatic is Urmet S.p.A.'s company access automation systems. Aprimatic products are designed, developed and manufactured in compliance with **UNI EN ISO 9001** standards. This internationally acknowledged certification attests Urmet S.p.A.'s status as a leader in the Communication, Security and Building Automation industry and to the all-round quality of its products and services.

All Aprimatic products bear the mark 

Aprimatic is a registered trademark belonging to Aprimatic s.r.l.

THE URMET GROUP

Urmet Group.
Communication, security and energy.
All over the world, in every project.

Urmet Group means integration of expertise and international dimensions, to offer global solutions to its partners. Born in Italy, it was able to develop internationally and now it has a significant presence on the world market. Our Group designs, develops and markets

products and systems in the communication and security sectors, as well as in energy management and saving and telecommunications. In Italy it is a leading manufacturer of video door phone and telephone systems, access automation systems and control, professional intrusion

alarm systems, fire alarm and video surveillance systems, from private homes to town redevelopment planning, up to large public infrastructures. It is as a global partner for product quality and service efficiency.

SYSTEMS FOR INTEGRATED COMMUNICATION AND SECURITY

Systems and Products for Video Door Phone, Intrusion Alarm, Access Control, Fire Alarm, Video Surveillance, Residential Applications.

SYSTEMS FOR ENERGY MANAGEMENT AND SAVING

Photovoltaic, Wind Power, Hydroelectric Power, Geothermal Energy, Biomass. Heat Metering and Management Systems.

TELECOMMUNICATION SYSTEMS AND SOLUTIONS

Terminals, Telemetry Systems, Road Lighting, Public Telephone Network Systems, Heat Exchangers, Transport, Remote Management Systems.

APRIMATIC

The champion of automation.

Aprimatic is the leader in Italy and in Europe for access automation systems. Thanks to the experience gained in two decades of presence in the market and the very high know-how of

designers, engineers, testers and consultants, Aprimatic offers its customers high performance, product reliability and value retention in time. Today, Aprimatic is the only company offering

all kinds of automation systems, with a complete range of products suitable for residential, commercial and industrial application as well as for public areas.

EXTERNAL CLOSING SYSTEMS

Technological solutions for swing and sliding gates, up-and-over doors and traffic barriers.

DOORS, WINDOWS AND SHUTTERS

Systems for rolling shutters, shutters, windows and domes, sliding doors and home automation.

KIT

Ready-made solutions to meet the most common residential automation requirements.

Catalogue guide

EXTERNAL CLOSING SYSTEMS

The RED section of the catalogue features automation systems for gates, up-and-over doors and for entrances installed in public areas, as well as all-in-one kits for a wide range of automation needs in residential and industrial applications

DOORS, WINDOWS AND SHUTTERS

The WHITE section of the catalogue presents automation devices for doors, windows and rolling shutters. A specific chapter of this section is devoted to home automation solutions

technical info

The GREY appendix contains the technical data sheets with product dimensions

AT THE SERVICE OF PROFESSIONALS

A COMPLETE RANGE

Aprimatic offers a complete range for every type of product, satisfying the needs of all end users and ensuring their complete satisfaction.

COMMERCIAL ORGANISATION

Aprimatic supports its customers during the entire process, helping them choose the best solution, providing assistance and guaranteeing a complete and accurate service. The sales network covers the entire Italian territory and responds in real time to doubts or installation needs, providing specialised, competent and timely support.

CUSTOMER SERVICE

Aprimatic Customer Service is available to companies and installers to provide all the necessary support during installation and operation of the equipment.

SERVICE NETWORK

Over forty authorised service centres throughout Italy constitute an extensive, homogeneous and always up-to-date network.

WEB

Click on www.aprimatic.com to enter a world of information and services designed for end customers and installers, including special on-line services such as consultation of detailed exploded views.

TRAINING

Meetings for the presentation of news, courses on new products and systems, update seminars on professional and regulatory issues improve the quality of everyone's work and represent a benefit for end customers.

SHOWCASE

Traffic barriers

24V barriers used for the management of continuous use car parks in large apartment buildings, companies, or even private car parks with frequent passage of vehicles during the day.

Hydraulic operators

Hydraulic operators for swing gates with hydraulic brake during opening and closing.

Operator for up-and-over doors

Brand new low-voltage electromechanical operator for sectional and counterweight-balanced up-and-over doors.

12V Photocells

The wall-mounted photocells with a 20-metre range can also be welded onto a post. They are self-aligning and with IP45 protection degree. They operate with 12V and 24V power supply.

Radar

New microwave + IR mixed technology radar for automatic door control.

Wireless tubular motors

The entire range of Aprimatic Revolux, known for its performance and reliability, is now available version with control multiposition for the management of the movement of adjustable shutters, with integrated receiver.

Remote controls for tubular motors

The new Revolux wireless remote controls for tubular motors are available with one or five programmable channels.

Gate remote control

New remote control for gates and up-and-over doors supporting up to 4 radio channels for the transmission of pulses.

EUROPEAN STANDARDS

Standards **EN 12453** and **EN 12445** set out the minimum safety parameters. For automatic closing systems whose operation involves persons. These standards allow the identification of the necessary technical measures aimed at ensuring the safety of users and facilities.

Classification criteria include the position of the system, the type of user and the control mode.

THE SYSTEM can be:

a system can be found in a delimited **private area**, in a **private area which adjoins a public area** or in a completely **public area**.

THE USER can be:

a user is **not instructed** when he/she has not received the necessary information to operate the automation system; this generally happens for automation systems found in public areas. For automation systems in private areas, instead, the user is usually **instructed**.

THE CONTROL can be:

the system can be controlled in a number of ways: **automatic** when the pulse activates a series of operations and not a single action; **radio-controlled** if a pulse corresponds to a single operation (e.g.: opening or closing); operated by **pulses from a fixed position** if the activation of the system is possible from a single location even without automatic control reset; finally, it may lack the **self-holding** function, if the desired action lasts as long as the command activation.

MANDATORY SAFETY DEVICES

- A – Operator present and control with automatic reset
- B – Operator present and control with manual reset
- C – Mechanical or electronic devices (you need to check the conformity of the impact forces tolerated compared to reference standards)
- D – Infrared photocells to detect obstacles in the operation area

THE SCENARIO – REGULATORY REQUIREMENTS

	Control device			
	without self-holding	with pulse from a fixed position	radio control	automatic
private user	A	C	C	C + D
private area not instructed user	C	C	C + D	C + D
public area instructed user	B	C	C + D	C + D
public area not instructed user	~	C + D	C + D	C + D

EXAMPLE OF A TYPICAL SYSTEM COMPLIANT WITH EN 12453 - EN 12445 STANDARDS

System ON A PUBLIC AREA

The system marks the boundary between a private and a public area (e.g., the driveway gate with a ramp for a condominium garage).

User INSTRUCTED

The system is activated by people having received a proper training on the automation system operation.

Control RADIO

To send pulses even from a fixed position (e.g. from a desktop) or from a mobile station.

Safety is guaranteed by INFRARED BEAM PHOTOCELLS

Automatic automation systems are designed for connection of all types of infrared beam photocells, ensuring greater safety for the user.

SAFETY EDGES

Sensitive edge used to prevent the risk of crushing due to electric gates movement. In case of contact, the automation system inverts motion and prevents damage to people and property.

CHOOSING THE RIGHT PRODUCT

Easy to purchase, fast to install

Aprimatic optimises your stock with only a few references. Packaging is designed to ensure exceptionally clear and readable information, making it easier to find the right product. Aprimatic has already identified all the difficulties that may be encountered by installers when working with highly

technological solutions and has therefore decided to solve these problems with practical ready-to-use kits. Everything you need is ready for assembly: discover the advantage of these genuine technological gems to make your installations quicker, easier and more durable.

Three-year warranty.
Aprimatic kits are covered by an extended warranty.
For an unbeatable long-lasting safety.

TYPES

SWING GATES

Recommended installation for gates with one or two wings, where the operating space is reduced by the presence of walls and fences. Wings usually open inwards inside the property and require a certain room for movement.

Operators with vertical engine

- **KIT G-MATIC AP350**

Articulated arm operators

- **KIT AP423**
- **KIT AP424**
- **KIT TWENTY 270 B**
- **KIT TWENTY 270 C**
- **KIT TWENTY 270 SF**

- **KIT FLEXI**

SLIDING GATES

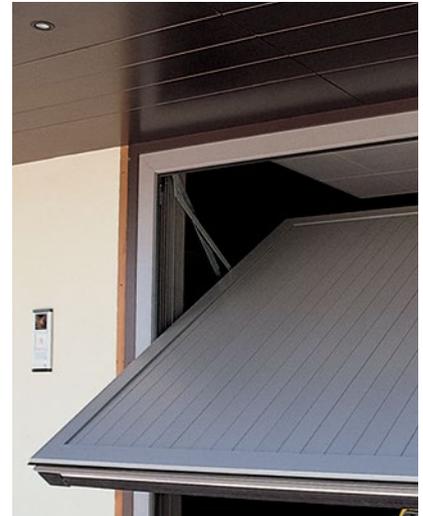

Easy installation, ideal for moving a single wing, equipped with rack, running on a ground rail. This type of system is used in long and narrow spaces where the gate slides during opening and closing.

- **KIT MONZA ONDA 424**
- **KIT HOCKENHEIM ONDA 624**
- **KIT ONDA 623**
- **KIT INDIANAPOLIS ONDA 801**

UP-AND-OVER DOORS

Ideal installation for spring-loaded or counterweight-balanced up-and-over doors and sectional doors, for residential use.

- **KIT ESTORIL ALZO**
- **KIT GA-MATIC CF 800**
- **KIT GA-MATIC CF 1000**

KIT RACING RAIDER 2500

41026/800-801

Self-learning configuration and possibility of adjusting the parameters through a simple and intuitive menu.

Pre-drilled adjustable rear bracket. The arms are equipped with mechanical limit stops to allow stroke adjustment.

Continuous operation guaranteed, in case of power supply failure, by two optional emergency batteries.

The use of an electric lock is recommended **for gate wings longer than 1.8 metres.**

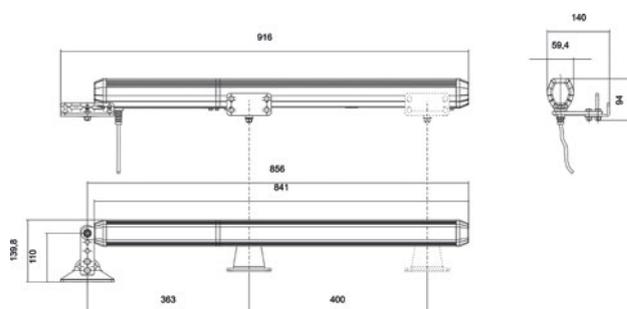

TECHNICAL DATA

MAIN POWER SUPPLY	230 Vca - 50 Hz
MOTOR POWER SUPPLY	24 Vdc
MAX. THRUST FORCE	2500 N
MAX. WING WIDTH WITHOUT ELECTRIC LOCK	1,8 m
MAX. WING WIDTH WITH ELECTRIC LOCK	3 m
MAX. WING WEIGHT	300 kg (for 3 m wing) 500 kg (for 1.8 m wing)
WEIGHT KIT	10 kg

Kit for swing gates, for residential use, with electromechanical arm operator.

OPERATOR DIMENSIONS

KIT 41026/801: **733,47** euro. The kit includes

ITEM NUMBER	DESCRIPTION	Pcs.
41026/001	RAIDER 2500 Operator	2
41600/014	RSK-24-2500 control unit (with receiver 433.92MHz PL-ECO)	1
41905/004	TM4 - 433.92 MHz four-channel transmitter	1
41929/003	KIT antenna 433.92 MHz for ET2N-ET20N	1

ITEM NUMBER	DESCRIPTION	Pcs.
41812/008	ER 12-24V Pair of photocells	1
	Aprimatic signal panel	

41026/800 (**792,67** euro) The kit includes (in addition to 41026/801):

41840/006	ET2N flashing light	1
41830/007	PC12E Wall-mounted key-operated switch	1

[*] For gates with wings longer than 1.8 m, it is necessary to use the electric lock.

NOTE: Not compatible with previous Raider model

NOTE: For the available safety and signalling devices and for installation accessories, see section "Control units and indicators" in this catalogue (refer to the initial index).

NOTE: All prices are subject to variation.

KIT AP424

41033/800-801

Elegant design suggests classic hydraulic models.

Irreversible motor for a maximum power during the closing.

Multiposition brackets for easy and fast assembly.

Stainless steel screw for maximum strengness and long life.

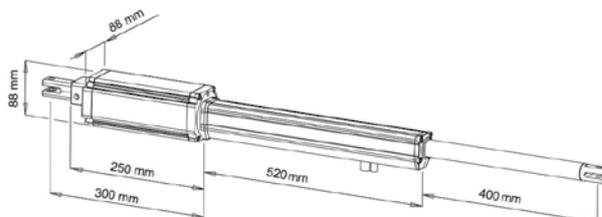

Kit for swing gates, for residential, with electromechanical arm operator.

TECHNICAL DATA

MAIN POWER SUPPLY	230 Vac - 50 Hz
MOTOR POWER SUPPLY	24 Vdc
MAX. THRUST FORCE	1500N
MAX. WING WIDTH WITHOUT ELECTRIC LOCK	1,8 m
MAX. WING WIDTH WITH ELECTRIC LOCK	3 m
MAX. WING WEIGHT	300 kg (for 2 m wing) 200 kg (for 3 m wing)
WEIGHT KIT	15 kg

(*) For gates with wings longer than 1.8 m, it is necessary to use the electric lock.

KIT G-MATIC AP 350

41035/800-801

Made in Italy.

Resistant to high and low temperature.

Simple installation with brackets secured to the gate. The most widespread among swing gate automation systems. Possibility to create single or double wing systems. Unit control with microprocessor and 433Mhz receiver, easy setting; Irreversible operator with key to lock and unlock.

Complies with the current safety standards as regards to obstacle detection and inversion of movement in accordance with **EN12453** and **EN12445** (product certified under ideal installation conditions).

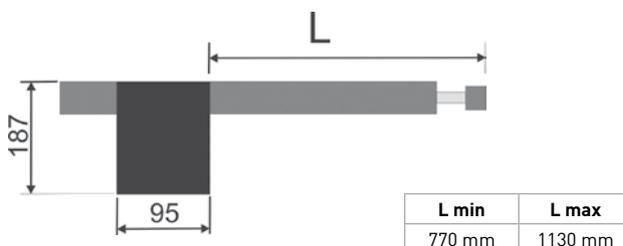

TECHNICAL DATA

MAIN POWER SUPPLY	230 V - 50 Hz
MAX. WING WIDTH WITHOUT ELECTRIC LOCK	1,8 m
MAX. WING WIDTH WITH ELECTRIC LOCK	3 m
MAX. WING WEIGHT	350 kg
WEIGHT KIT	17 kg

Kit for swing gates up to 350Kg per leaf. Residential use, with electromechanical arm operator.

OPERATOR DIMENSIONS

41035/801 (**603,87** euro) The kit includes:

ITEM NUMBER	DESCRIPTION	Pcs.
41035/001	Left swing gate operator	1
41035/002	Right swing gate operator	1
41628/001	BA230 control unit (with receiver 433.92MH)	1
41905/004	TM4 433,92 Mhz four channel transmitter	2
	Aprimatic signal panel	

41035/800 (**703,13** euro)

The kit includes (in addition to 41035/801):

ITEM NUMBER	DESCRIPTION	Pcs.
41840/006	ET2N - 24 V LED flashing light	1
41812/008	ER 12-24V Pair of photocells	1
41929/003	Antenna Kit	1

NOTE: For the available safety and signalling devices and for installation accessories, see section "Control units and indicators" in this catalogue (refer to the initial index).

NOTE: All prices are subject to variation.

KIT FLEXI

41029/800

Articulated arm fitted with mechanical limit stop, to adjust the stroke and prevent the positioning in negative angle.

Control unit on board of the operator, with full self-learning configuration. It can move wings having a maximum length of 3 m (without electric lock).

Ideal for gates with large pillars.

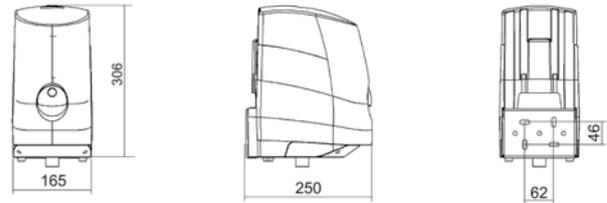

Articulated electromechanical arm for swing gates for residential use.

TECHNICAL DATA

MAIN POWER SUPPLY	230 Vca - 50 Hz
MOTOR POWER SUPPLY	24 Vdc
MAX. WING WIDTH	3 m
WITHOUT ELECTRIC LOCK	
MAX. WING WEIGHT	300 kg
PROTECTION DEGREE	IP44
WEIGHT KIT	30 kg

OPERATOR DIMENSIONS

KIT 41029/800: **1389,40** euro
The kit includes:

ITEM NUMBER	DESCRIPTION	Pcs.	
41029/001	FLEXI 300 OPERATOR 1 operator Master with dedicated on-board electronic unit and 433.92MHz built-in radio receiver 1 operator Slave	2	
41029/054	Articulated arm for FLEXI operator	2

NOTE: All prices are subject to variation.

KIT TWENTY 270 B

41012/800

Simple and linear design with a compatible aesthetics for all types of gates.

The standard hydraulic slowing down system in the closing (electronically adjustable) allows a soft approach of the wings, silently and without mechanical stress to the structure;

Emergency release system under the top cover.

It equipped with front hitch ball joint uniball threaded 20mm, like the previous range ZT44, which allows to retrieve any tolerances during the fixing.

Extremely sturdy and flexible pillar mounting thanks to the rear flange with articulated aluminium fork.

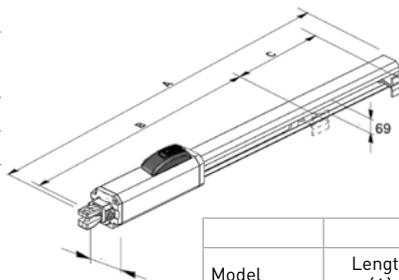

Kit for swing gates, with hydraulic operator with lock on openings and closing. Condominium use.

TECHNICAL DATA

MAIN POWER SUPPLY	230 V - 50 Hz

KIT MONZA ONDA 424

41101/800-802

Complies with the current safety standards as regards to obstacle detection and inversion of movement in accordance with **EN12453** and **EN12445** (product certified under ideal installation conditions). The electronic torque adjustment combined with encoder technology guarantees a gradual approach during opening and closing movements.

Continuity of operation guaranteed, in the event of a power supply failure, by a set of optional batteries which may be fitted in the operator casing.

Sturdy and reliable thanks to the die-cast aluminium casing.

Worm screw gear motor with aluminium body and on-board electronic control unit. Equipped with adjustable-height foundation plate.

Emergency release lever with customised key, for use during power supply failures.

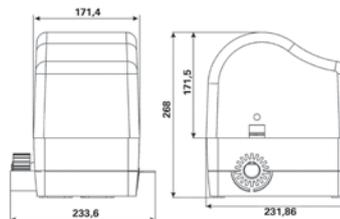

Kit for sliding gates with wings up to 400 kg. Residential use.

TECHNICAL DATA

MAIN POWER SUPPLY	230 Vac - 50 Hz
MOTOR POWER SUPPLY	24 Vdc with encoder
MAX. THRUST FORCE	450 N

KIT 41101/800: **613,08** euro

The kit includes: (in addition to 41101/802):

ITEM NUMBER	DESCRIPTION	Pcs.	
41840/006	ET2N 24V Led flashing light	1	
41830/007	PC12E Wall-mounted key-operated switch	1	

ITEM NUMBER	ACCESSORIES COMPLETING THE KIT	€
41180/064	CP - Aprimatic 10m plastic rack with steel core and mounts (module 4)	156,09

NOTE: For the available safety and signalling devices and for installation accessories, see section "Control units and indicators" in this catalogue (refer to the initial index).

NOTE: All prices are subject to variation.

KIT HOCKENHEIM ONDA 624

41102/800-802

Complies with the current safety standards as regards to obstacle detection and inversion of movement in accordance with **EN12453** and **EN12445** (product certified under ideal installation conditions). The electronic torque adjustment combined with encoder technology guarantees a gradual approach during opening and closing movements.

Continuity of operation guaranteed, in the event of a power supply failure, by a set of optional batteries which may be fitted in the operator casing.

Sturdy and reliable thanks to the die-cast aluminium casing.

Worm screw gear motor with aluminium body and on-board electronic control unit. Equipped with adjustable-height foundation plate.

Emergency release lever with customised key, for use during power supply failures.

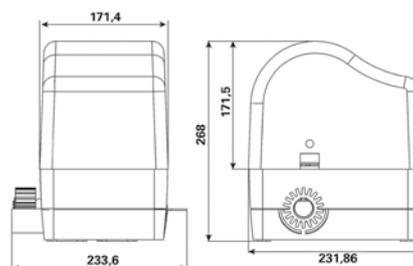

Sliding gate kit. Residential use for wings up to 600 kg.
Condominium use for wings up to 400 kg.

TECHNICAL DATA

MAIN POWER SUPPLY	230 Vac - 50 Hz
MOTOR POWER SUPPLY	24 Vdc with encoder
ABSORBED POWER	80 W
ABSORBED CURRENT	4,2 A
MAX. THRUST FORCE	650 N
MAX. LINEAR SPEED	10 m/min
OPERATING TEMPERATURE	-20° +55° C
MAX. GATE WEIGHT	600 kg
HEIGHT OF PINION FROM GROUND	70 mm

NOTE: All prices are subject to variation.

KIT INDIANAPOLIS ONDA 801

41127/810-811

Maximum safety thanks to the on-board electronic control unit with electronic torque adjustment.
An additional anti-crushing card can be connected as an optional for gate auto reverse if an obstacle is detected during gate closing.

Steel gears with permanent lubrication.

Because it is self-locking, this gear motor keeps the gate shut. Therefore, it is not necessary to use a lock.

In the event of power supply failure you can proceed with the manual key release via a convenient unlocking device.

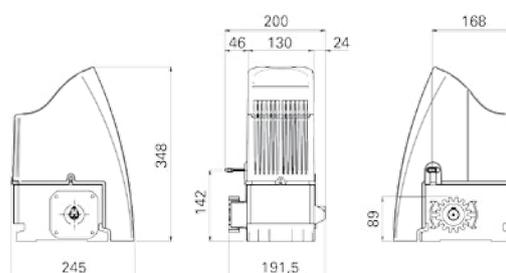

Kit for sliding gates. Residential use for wings up to 800 kg.
Condominium use for wings up to 500 kg.

TECHNICAL DATA

MAIN POWER SUPPLY	230 V - 50 Hz
THRUST FORCE	1250 N
MAX. WING WEIGHT	800 kg (residential use) 500 kg (condominium use)
WEIGHT KIT	13 kg

NOTE: All prices are subject to variation.

KIT ESTORIL ALZO

41210/801

Self-locking gear motor, keeping the up-and-over door closed even in the absence of an electric lock. **External emergency release** (optional) for accessing the garage in case of power supply failure.

Maximum anti-crushing safety for the lower edge of the door, thanks to the on-board electronic control unit equipped with electronic torque adjustment and anti-crushing system (which can be disabled).

Great quality material: steel drive parts, die-cast aluminium gear motor body and ABS protective cover guarantee IP 44 protection degree.

Slowdown system for a soft approach of the door during opening and closing, thus avoiding noise and mechanical stress to the structure.

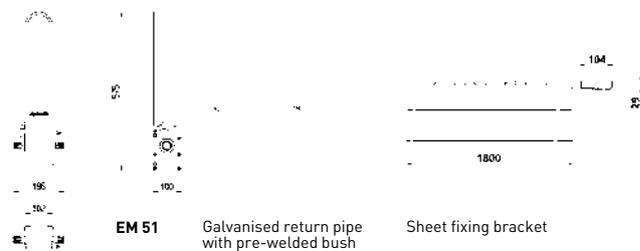

Kit for counterweight-balanced up-and-over doors with electromechanical operator. Residential use.

TECHNICAL DATA

MAIN POWER SUPPLY	230 V - 50 Hz
MAX. SHEET DIMENSION	3,5 x 3 m (for single motor) 5 x 3 m (for double motor drive)

OPERATOR DIMENSIONS

KIT 41210/801: **641,52** euro

ITEM NUMBER	DESCRIPTION	Pcs.
41210/002	ALZO electromechanical operator with T3SC on-board electronic control unit and 433.92 MHz built-in superheterodyne radio receiver	1
41905/004	TM4 - 433.92 MHz four-channel transmitter	1

ITEM NUMBER	DESCRIPTION	Pcs.
41210/058	Pair of plasma-cut, quick-fit curved arms	1
	Aprimatic signal panel	

ITEM NUMBER	ACCESSORIES COMPLETING THE SINGLE MOTOR KIT	€
41210/062	HARDWARE KIT (for single-motor installation) The package includes: Two 1.8 m, Ø 25 mm x 3 galvanised pipes with pre-welded bushes, 180 cm sheet fixing bracket	126,05
For two-motor installations suitable for doors up to 5 x 3 m, add:		
41210/001	EM51 SLAVE OPERATOR Including a pair of 20 cm pipes with splined bush	396,43
41210/061	ST180 - sheet fixing bracket L=180cm	32,45
41210/069	Pair of quick fit straight arms	64,91

NOTE: For the available safety and signalling devices and for installation accessories, see section "Control units and indicators" in this catalogue (refer to the initial index).

NOTE: All prices are subject to variation.

KIT GA-MATIC CF800 / CF1000

41242/800 / 41242/810

Maximum anti-crushing safety thanks to the on-board electronic control unit equipped with auto reverse function when an obstacle is detected while closing the gate.

GA-MATIC operators can be used for sectional doors if installed with the adapter arm accessory, also for counterweight-balanced up-and-over door automation.

Slowdown system for a soft approach of the door during opening and closing, thus avoiding noise and mechanical stress to the structure.

Timed courtesy light built into the operator to light up the garage during opening and closing.

Silent and resistant thanks to the belt drive.

Continuity of operation guaranteed, in the event of a power supply failure, by a set of optional batteries which may be fitted in the operator casing.

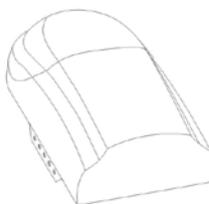

Kit with low-voltage electromechanical operator for sectional and counterweight-balanced up-and-over doors. Residential use.

TYPICAL SYSTEM COMPOSITION

- | | | |
|---|--|---|
| <p>1) Operator: device allowing, with an external power supply, to move a gate.</p> <p>2) Control unit: electronic unit for handling the operator movement;</p> <p>3) Transmitter: wireless equipment that transmits information to the control unit.</p> | <p>4) Antenna: device that increases the reception of the signals sent by the transmitter.</p> <p>5) Flashing light: light signalling that the gate is moving.</p> <p>6) Pair of photocells: safety devices stopping gate movement if an obstacle is detected;</p> | <p>7) Control unit: it allows activation of gate movement through a mechanical or electronic key.</p> <p>8) Electric lock: to be included based on gate wing width.</p> |
|---|--|---|

EUROPEAN STANDARDS

Standards **EN 12453** and **EN 12445** set out the minimum safety parameters. For automatic closing systems whose operation involves persons. These standards allow the identification of the necessary technical measures aimed at ensuring the safety of users and facilities.

Classification criteria include the position of the system, the type of user and the control mode.

THE SYSTEM can be:

a system can be found in a delimited **private area**, in a **private area which adjoins a public area** or in a completely **public area**.

THE USER can be:

a user is **not instructed** when he/she has not received the necessary information to operate the automation system; this generally happens for automation systems found in public areas. For automation systems in private areas, instead, the user is usually **instructed**.

THE CONTROL can be:

the system can be controlled in a number of ways: **automatic** when the pulse activates a series of operations and not a single action; **radio-controlled** if a pulse corresponds to a single operation (e.g.: opening or closing); operated by **pulses from a fixed position** if the activation of the system is possible from a single location even without automatic control reset; finally, it may lack the **self-holding** function, if the desired action lasts as long as the command activation.

MANDATORY SAFETY DEVICES

A – Operator present and control with automatic reset

B – Operator present and control with manual reset

C – Mechanical or electronic devices (you need to check the conformity of the impact forces tolerated compared to reference standards)

D – Infrared photocells to detect obstacles in the operation area

THE SCENARIO – REGULATORY REQUIREMENTS

Dispositivo di comando

		without self-holding	with pulse from a fixed position	radio control	automatic
User and type of system	private area instructed user	A	C	C	C + D
	private area not instructed user	C	C	C + D	C + D
	public area instructed user	B	C	C + D	C + D
	public area not instructed user	~	C + D	C + D	C + D

EXAMPLE OF A TYPICAL SYSTEM COMPLIANT WITH EN 12453 - EN 12445 STANDARDS

System **ON A PUBLIC AREA**

The system marks the boundary between a private and a public area (e.g., the driveway gate with a ramp for a condominium garage).

User **INSTRUCTED**

The system is activated by people having received a proper training on the automation system operation.

Safety is guaranteed by **INFRARED BEAM PHOTOCELLS**

Aprimatic automation systems are designed for connection of all types of infrared beam photocells, ensuring greater safety for the user.

Control **RADIO**

To send pulses even from a fixed position (e.g. from a desktop) or from a mobile station.

Easy to release in case of power blackout
Resistant to high and low temperatures

Suitable for left- and right swing leafs

Max. leaf opening 350kg length 3 mt

Rod stroke 400mm
Power supply 230Vac

Made in Italy

Safety lock / unlock

IDEAL INSTALLATION (1.8 m wing)*

i209

**Low-voltage
electromechanical
articulated arm, for swing
gates for residential use.**

TECHNICAL DATA

MAIN POWER SUPPLY	230 Vac - 50 Hz
MOTOR POWER SUPPLY	24 Vcc
MAX. WING WIDTH	3 m without electric lock
MAX. WING WEIGHT	300 kg
PROTECTION DEGREE	IP44
ABSORBED POWER	45 W per motor
ABSORBED CURRENT	1,87 A per motor
MAXIMUM TORQUE	150 Nm
MAX. OPENING ANGLE	120°
OPERATING TEMPERATURE RANGE	-20° +55° C
ANTI-CRUSHING SAFETY	Electronic
WEIGHT OPERATOR	7 Kg

On-board control unit with full self-learning configuration.

Articulated arm fitted with mechanical limit stop, to adjust the desired stroke and prevent negative angle positioning.

Emergency release positioned on the side

of the operator with customised key. It can be remotized to allow the release from the outside.

Optional 24 V battery kit for automation operation in case of power supply failure.

It can drive wings with a maximum length of 3 m (without electric lock).

(*) Prodotto certificato in condizioni installative ideali.

IDEAL INSTALLATION (max. 3 m wing)*

EXTERNAL CLOSING SYSTEMS

TWENTY 270

Hydraulic swing gate operators. For condominium and intensive use.

UNIBALL MOUNT

TECHNICAL DATA

	TWENTY 270
MAIN POWER SUPPLY	230 V - 50 Hz
MOTOR POWER SUPPLY	250 W
MAX. WING WIDTH WITHOUT ELECTRIC LOCK	1.8 m
MAX. WING WIDTH WITH ELECTRIC LOCK	3 m
MAX. CYCLE NUMBER	800 cycles/day
PROTECTION DEGREE	IP55
MAX. THRUST FORCE	5500N
VERSIONS	B - C - SF
SLOWDOWN ON CLOSING	Yes (electronically adjustable)
SLOWDOWN ON CLOSING AND OPENING	NO
LINEAR SPEED	1.3 cm/s
OPERATING TEMPERATURE	-20° +70° C
ROD STROKE	270 mm
WEIGHT OPERATOR	9.8 kg

Simple and linear design with a compatible aesthetics for all types of gates.

The standard hydraulic slowing down system in the closing (non-adjustable) allows a soft approach of the wings, silently and without mechanical stress to the structure; The slowing down can be electronically adjustable.

It equipped with front hitch ball joint uniball threaded 20mm, like the previous range ZT4-ZT44, which allows to retrieve any tolerances during the fixing.

IDEAL INSTALLATION

EXTERNAL CLOSING SYSTEMS

EM 73N

24
Vcc

400
kg

i 211

**Underground
electromechanical
operator for swing gates.
Residential use.**

TECHNICAL DATA

MAIN POWER SUPPLY	230 V - 50 Hz
MOTOR POWER SUPPLY	24 Vcc
WING OPENING ANGLE	110°, 140°, 180°
WIDTH / WEIGHT	1,8 m / 400 kg 3,5 m / 200 kg*
PROTECTION DEGREE	IP67
ABSORBED POWER	200 W
ABSORBED CURRENT	10 A
NOMINAL TORQUE	280 Nm
OPERATING TEMPERATURE	-20° +70° C
110° OPENING TIME	20 s
SLOWDOWN	Optional
WEIGHT OPERATOR	9 Kg

(*) It is necessary to use the electric lock with wings longer than 1.8 m.

The underground system is not visible, and is ideal for those who do not wish to alter the gate design style.

Maximum safety thanks to the 24 V power supply voltage.

Anti-crushing safety ensured by a simple adjustment of the T4 POWER electronic control unit. Cataphoresis-coated sheet metal.

self-supporting container.

System of levers with anti-corrosion electro-plating. 110° gate opening.

EM 73N can be equipped with a separate lever system that enables opening up to 140° or a chain pinion system for opening up to 180°.

The application of an optional slowdown system allows the EM 73N to let the doors perform a fast movement during the stroke, and a soft approach on opening and closing, thus eliminating noisy impacts and rebounds.

For greater safety of operation, a manual emergency release device (SB73) is available upon request. A customised key-operated lock prevents accidental actuation of the wing's emergency release pedal. The lock can be activated from both inside and outside the gate.

IDEAL INSTALLATION (max. 2 m wing)

Very low noise levels thanks to the hydraulic brake used to slow down the gate during opening and closing, thus preventing rebounds and noisy impacts.

The automation is located underground and therefore does not affect the design style of the gate.

The anti-crushing system consists of very sensitive bypass valves, calibrated during installation. They immediately cut the hydraulic pressure when an obstacle is detected, to ensure maximum system safety.

The system features an easy-maintenance self-supporting box. The jack is accessed by removing the stainless steel cover without removing the gate wing.

An easy-to-use manual release device ensures gate operation **in the event of power supply failure.**

TYPICAL SYSTEM COMPOSITION

- 1) Operator: device allowing, with an external power supply, to move a gate.
- 2) Control unit: electronic unit for handling the operator movement.
- 3) Transmitter: wireless equipment that transmits information to the control unit.
- 4) Antenna: device that increases the reception of the signals sent by the transmitter.
- 5) Flashing light: light signalling that the gate is moving;
- 6) Pair of photocells: safety devices stopping the gate movement in case of obstacles.
- 7) Control unit: it allows activation of gate movement through a mechanical or electronic key.
- 8) Safety edge: sensitive edge used to prevent the risk of crushing due to electric gate movement. In case of contact, the automation system inverts motion and prevents damage to people and property.

EUROPEAN STANDARDS

Standards **EN 12453** and **EN 12445** set out the minimum safety parameters. For automatic closing systems whose operation involves persons. These standards allow the identification of the necessary technical measures aimed at ensuring the safety of users and facilities.

Classification criteria include the position of the system, the type of user and the control mode.

THE SYSTEM can be:

a system can be found in a delimited **private area**, in a **private area which adjoins a public area** or in a completely **public area**.

THE USER can be:

a user is **not instructed** when he/she has not received the necessary information to operate the automation system; this generally happens for automation systems found in public areas. For automation systems in private areas, instead, the user is usually **instructed**.

THE CONTROL can be:

the system can be controlled in a number of ways: **automatic** when the pulse activates a series of operations and not a single action; **radio-controlled** if a pulse corresponds to a single operation (e.g.: opening or closing); operated by **pulses from a fixed position** if the activation of the system is possible from a single location even without automatic control reset; finally, it may lack the **self-holding** function, if the desired action lasts as long as the command activation.

MANDATORY SAFETY DEVICES

A – Operator present and control with automatic reset

B – Operator present and control with manual reset

C – Mechanical or electronic devices (you need to check the conformity of the impact forces tolerated compared to reference standards)

D – Infrared photocells to detect obstacles in the operation area

THE SCENARIO – REGULATORY REQUIREMENTS

		Control device			
		Without self-holding	With pulse from a fixed position	Radio control	Automatic
Utente e tipo di impianto	Private area instructed user	A	C	C	C + D
	Private area not instructed user	C	C	C + D	C + D
	Public area instructed user	B	C	C + D	C + D
	Public area not instructed user	~	C + D	C + D	C + D

EXAMPLE OF A TYPICAL SYSTEM COMPLIANT WITH EN 12453 - EN 12445 STANDARDS

System ON A PUBLIC AREA

The system marks the boundary between a private and a public area (e.g., the driveway gate with a ramp for a condominium garage).

User INSTRUCTED

The system is activated by people having received a proper training on the automation system operation.

Control RADIO

To send pulses even from a fixed position (e.g. desktop) or from mobile stations

Safety is guaranteed by INFRARED BEAM PHOTOCELLS

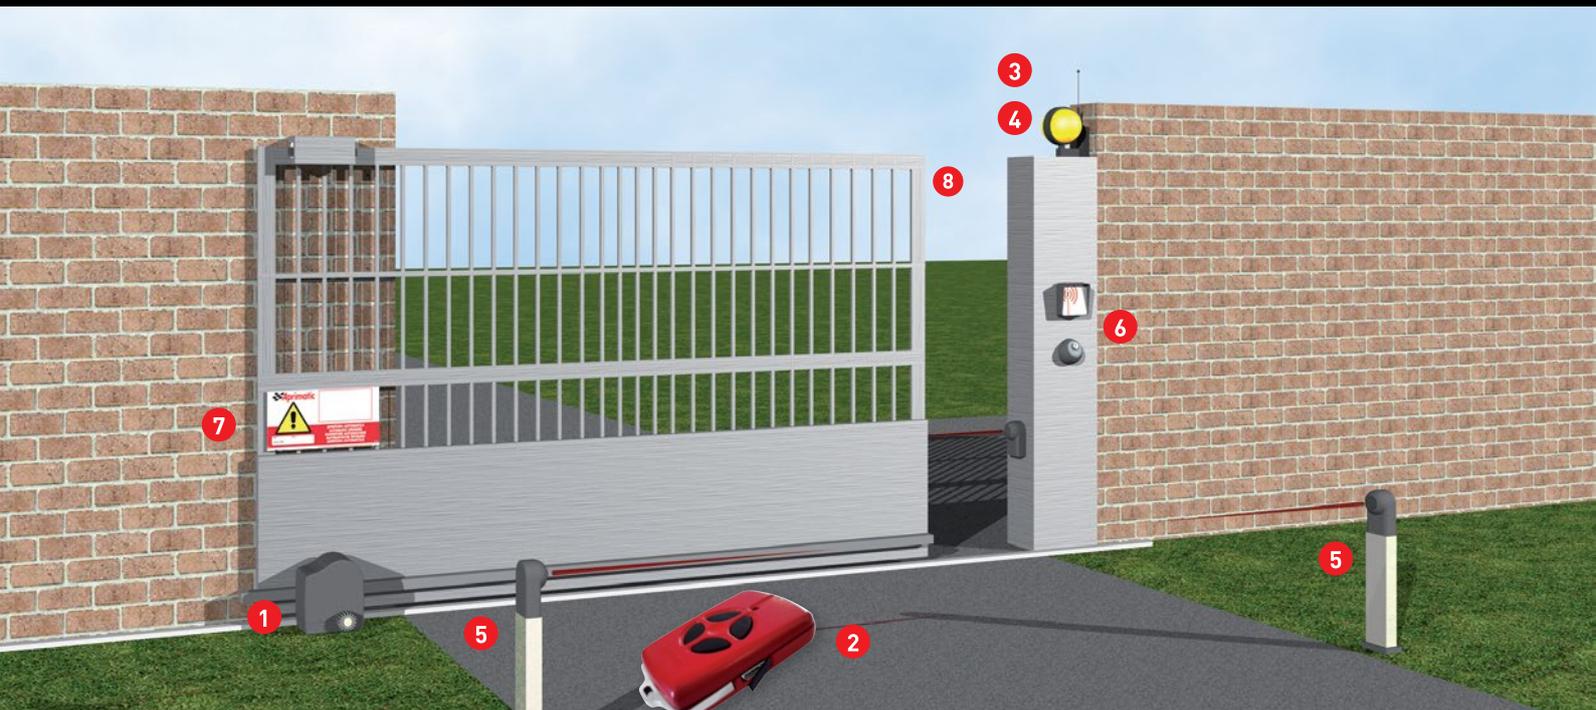

Automatic automation systems are designed for connection of all types of infrared beam photocells, ensuring greater safety for the user.

SAFETY EDGE

Sensitive edge used to prevent the risk of crushing due to electric gates movement. In case of contact, the automation system inverts motion and prevents damage to people and property.

ONDA 424

Low-voltage gear motor
for sliding gates.
Residential use for wings
up to 400 kg.

TECHNICAL DATA

MAIN POWER SUPPLY	230 Vac - 50 Hz
MOTOR POWER SUPPLY	24 Vdc
MAX. WING WEIGHT	400 kg
CYCLE NUMBER	100 cycles/day
PROTECTION DEGREE	IP44
MAX. ABSORBED POWER	80 W
MAX. ABSORBED CURRENT	4.2 A
MAX. THRUST FORCE	450 N
MAX. LINEAR SPEED	10 m/min
OPERATING TEMPERATURE	-20° +55° C
HEIGHT OF PINION FROM GROUND	55 mm
WEIGHT OPERATOR	7 Kg

Complies with the current safety standards as regards to obstacle detection and inversion of movement in accordance with **EN12453** and **EN 12445 (*)**.

The electronic torque adjustment combined with encoder technology guarantees a gradual approach during opening and closing movements.

Continuity of operation guaranteed, in the event of power supply failure, by a set of optional batteries which may be fitted inside the operator casing.

Sturdy and reliable thanks to the die-cast aluminium casing.

Worm screw gear motor with aluminium body and on-board electronic control unit. Equipped with adjustable-height foundation plate.

Emergency release lever with customised key, for use during power supply failures.

(*) Product certified under ideal installation conditions.

ONDA 800 / 801 E

Gear motor for sliding gates, for condominium use with wings up to 500 kg and for residential use with wings up to 800 kg.

TECHNICAL DATA

MAIN POWER SUPPLY	230 V - 50 Hz
MAX. WING WEIGHT	800 kg (Z16) 500 kg (Z20)
CYCLE NUMBER	100 cycles/day
PROTECTION DEGREE	IP44
ABSORBED POWER	260 W
THRUST FORCE	1250 N (Z16) 1000 N (Z20)
MAX. LINEAR SPEED	9,5 m/min (Z16) 12,0 m/min (Z20)
OPERATING TEMPERATURE	-20° +70° C
HEIGHT OF PINION FROM GROUND	70 mm
WEIGHT OPERATOR	11 Kg

ONDA 800 - with mechanical clutch for anti-crushing safety and preset for integrating the control unit.

ONDA 801E - with SC 230 on-board control unit and electronic clutch.

ONDA 801E / 800E - for residential gates up to 800 kg, or condominium gates up to 500 kg.

Self-locking worm screw gear motor with anodised aluminium body. Steel gears with permanent lubrication. No electric lock required.

Equipped with a practical key release for manual operation in the event of power supply failure.

Z20 20-teeth pinion available for installation in the gear motor for applications requiring faster automation speed.

AT 80 / AT 80 E

Sliding gate gear motor.
Intensive use for wings up
to 800 kg and residential use
for wings up to 1200 kg.

TECHNICAL DATA

MAIN POWER SUPPLY	230 V - 50 Hz
MAX. WING WEIGHT	1200 kg (Z16) 800 kg (Z20)
CYCLE NUMBER	200 cycles/day
PROTECTION DEGREE	IP44
ABSORBED POWER	330 W
THRUST FORCE	1400 N (Z16) 1120 N (Z20)
MAX. LINEAR SPEED	9,5 m/min (Z16) 12,0 m/min (Z20)
OPERATING TEMPERATURE	-20° +70° C
LUBRICANT QUANTITY	1,25 Lt
LUBRICANT TYPE	AprimOil SPIRAX
HEIGHT OF PINION FROM GROUND	70 mm
WEIGHT OPERATOR	13 Kg

Anti-crushing device with wet mechanical clutch.

Emergency release lever with customised key for gate release and an effective anti-intrusion protection.

Wet gear motor with self-locking reduction unit for lockless application.

Maximum reliability thanks to steel gears and permanent system lubrication.

It can be secured to the ground both via a fixed and a tilting support.

The latter allows operation even when the guide is not on a perfectly level surface, thus preserving mechanical parts from operational stress.

SC230 electronic control unit on board of the operator. On AT80E model only.

NOTE: All prices are subject to variation.

ONDA 2000 / 2001

i215

Gear motor for sliding gates with wings from 1000 up to 2000kg.
Intensive use.

TECHNICAL DATA

MAIN POWER SUPPLY	230 V - 50 Hz
MAX. WING WEIGHT	2000 kg
CYCLE NUMBER	1000 cycles/day
PROTECTION DEGREE	IP44
ABSORBED POWER	700 W
THRUST FORCE	2570 N
MAX. LINEAR SPEED	9,5 m/min
OPERATING TEMPERATURE	-20° +70° C
LIMIT STOP	Electromechanical
PINION	Z16
LUBRICANT TYPE	AprimOil SPIRAX
WEIGHT OPERATOR	18KG

For residential use, up to 2,000 kg,
or condominium use up to 1,000 kg.

ONDA 2001 - with on-board SC 230 device
and electronic control unit.

Practical lever release with customised
key for emergency operations.

ONDA 2000 - with mechanical clutch
for anti-crushing safety without on-board
electronic control unit.

Worm screw gear motor
with permanent lubrication and anodised
aluminium body.

NOTE: Due to the high power of the motor, properly evaluate the system risk analysis.

DRIVE SPEED m/1'	9	9
PINION MODULE	4 mm	4 mm
OPERATING TEMPERATURE	-15° +60° C	-15° +60° C
LUBRICANT BRAND	API DT SINT 320	API DT SINT 320
WEIGHT OPERATOR	35 Kg	50 Kg

These motors are designed to drive very heavy sliding gates. Intended for an intensive use, they guarantee a high degree of reliability

Adjustable dry clutch between the motor and gear unit, for the preservation of mechanical parts in case of obstacles to the movement of the gate.

Toothed pinion suitable for 4 mm rack module. Rack available in 1 m items with adjustment slots and spacers for gate installation. Bidirectional lever mechanical limit stop.

The electromechanical unit consists of a ventilated three-phase motor, coupled to a steel worm screw gear unit and a bronze gear.

Emergency manual operation thanks to a device for trip disengaging mounted on the gear unit, easily operable by rotating the lever.

The gear motor is encased in a stainless steel protective box with ABS inspection door that can be opened with a key.

AT 90 T / AT 92 T

i217

Automation for
industrial sliding gates.
Intensive use.

AT 90T MOTOR

TECHNICAL DATA	AT 90T	AT 92T
MAIN POWER SUPPLY	Three-phase 230/400 V - 50/60 Hz	Three-phase 230/400 V - 50/60 Hz
MAX. GATE WEIGHT	8000 Kg	12000 Kg
PROTECTION DEGREE	IP44	IP44
MOTOR POWER	1,5 kW	3 kW
MAX. ABSORBED CURRENT	3,5 A (a 400 V)	6,8 A (a 400 V)
NO. OF MOTOR/PINION REVS G/1'	1400/23	1400/20
DRIVE SPEED M/1'	8	9
PINION MODULE	5 mm	8 mm
OPERATING TEMPERATURE	-15° +60° C	-15° +70° C
LUBRICANT	DTSINT 320	TIVELA OIL SC320
WEIGHT OPERATOR	70 Kg	200 Kg

These motors are designed to drive very heavy sliding gates. Intended for an intensive use, they guarantee a high degree of reliability

Adjustable dry clutch between the motor and gear unit, for the preservation of mechanical parts in case of obstacles to the movement of the gate.

Toothed pinion suitable for 5 mm rack module (Mod. AT 90T) and 8 mm (Mod. AT 92T). Rack available in 1 m items with adjustment slots and spacers for gate installation.

Bidirectional lever mechanical limit stop.

The electromechanical unit consists of a ventilated three-phase motor, coupled to a steel worm screw gear unit and a bronze gear.

Emergency manual operation thanks to a device for trip disengaging mounted on the gear unit, easily activated by rotating the lever (for Mod. AT 90T).

The gear motor is encased in a stainless steel protective box with stainless steel inspection door that can be opened with a key.

UP-AND-OVER, SECTIONAL, FOLDING DOORS

ALZO
AT 50
GA-MATIC CF800
GA-MATIC CF1000

UP-AND-OVER / SECTIONAL DOORS

TYPES

UP-AND-OVER DOOR WITH COUNTERWEIGHTS OR SPRINGS (with door automation)

Door equipped with balancing system with counterweights or springs. On opening and closing, the door may wholly fall within or partly protrude. Application with single or double motor for heavy doors or up-and-over doors with built-in pedestrian door.

Electromechanical
ALZO
TWIN ALZO

Hydraulic
AT 50
TWIN AT50

COUNTERWEIGHT-BALANCED UP-AND-OVER DOOR (with drive or spring operator)

Door equipped with balancing system with counterweights or springs. On opening and closing, the door may wholly fall within or partly protrude.

Electromechanical
GA-MATIC CF800
GA-MATIC CF1000

SECTIONAL DOOR

Door equipped with spring balancing system. Consisting of many horizontal panels hinged together. When opening, the door falls entirely within the garage.

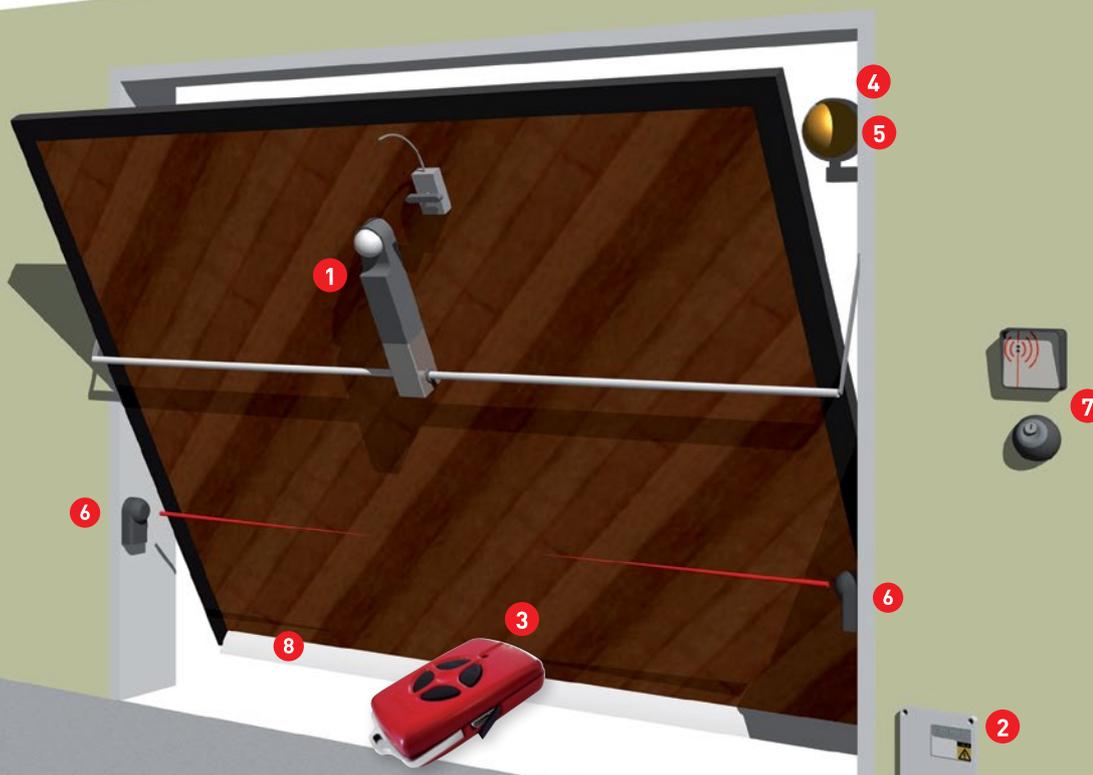

Electromechanical
GA-MATIC CF800
GA-MATIC CF1000

TYPICAL SYSTEM COMPOSITION

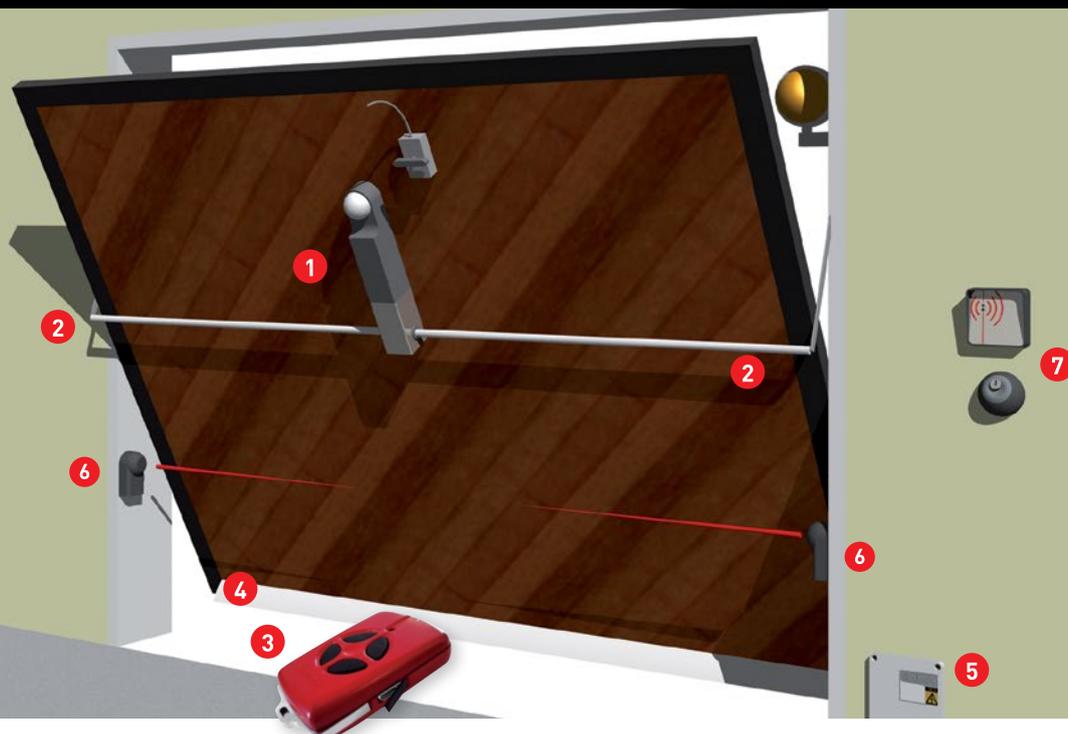

1) Operator: device allowing, with an external power supply, to move a door.
 2) Control unit: electronic unit for handling the operator movement.
 3) Transmitter: wireless equipment that transmits information to the control unit.
 4) Antenna: device that increases the reception of the signals sent by the transmitter.

5) Flashing light: light signalling that the gate is moving;
 6) Pair of photocells: safety devices stopping the gate movement in the presence of obstacles.
 7) Control unit: allows activation of gate movement through a mechanical or electronic key.
 8) Safety edge: Sensitive edge used to prevent the risk of crushing due to electric door movement. In case of contact, the automation system inverts motion and prevents damage to people and property.

ALZO

Electromechanical operator
for up-and-over doors
Residential use.

TECHNICAL DATA

MAIN POWER SUPPLY	230 V - 50 Hz
NOMINAL TORQUE	450 Nm
INTERMITTENT USE	50%
SHEET DIMENSION	3,5 x 3 m single motor 5 x 3 m double motor
PROTECTION DEGREE	IP44
ABSORBED POWER	250 W
ABSORBED CURRENT	1,6 A
OPERATING TEMPERATURE	-20° +60° C
OPENING TIME	17 s
OVERLOAD INTERVENTION	150° C
WEIGHT OPERATOR	9 Kg

Self-locking gear motor, keeping the up-and-over door closed even in the absence of an electric lock.

External emergency release (optional) for accessing the garage in case of power supply failure.

High-quality materials:
steel transmission parts die-cast aluminium gear motor body and ABS protection hood with IP44 protection degree.

Maximum anti-crushing safety for the lower edge of the door, thanks to the on-board electronic control unit equipped with electronic torque adjustment and anti-crushing system (which can be disabled) with sensitive edges.

Timed courtesy light built into the operator to light up the garage during opening and closing.

Slowdown system for a soft approach of the door during opening and closing, thus avoiding noise and mechanical stress to the structure.

One of the best operators in the market.
Developing a 450 Nm torque, it allows the automation of counterweight-balanced up-and-over doors with size:
- 3.5 x 3 m using only one motor;
- 5 x 3 m, or up-and-over with built-in pedestrian door using two motors.

AT 50

Hydraulic operator
for up-and-over doors.
Residential, condominium
and intensive use.

TECHNICAL DATA

AT50B7

MAIN POWER SUPPLY	230 V - 50 Hz
NOMINAL TORQUE AT 40 BAR	320Nm
SHEET DIMENSION	3,5 x 3 m single motor 5 x 3 m double motor
PROTECTION DEGREE	IP53
ABSORBED POWER	250 W
NOMINAL TORQUE AT 40 BAR	320 Nm
OPERATING TEMPERATURE	-20°+60° C
OPENING TIME	13 s approx..
MAX. OPERATING PRESSURE	40 bar
PUMP CAPACITY	1 Lt/min
OIL QUANTITY	1,3 Lt
WEIGHT WITH OIL	13 kg
OIL TYPE	AprimOil
SLOWDOWN	With T3E unit
WEIGHT OPERATOR	10 Kg

Maximum anti-crushing safety thanks to the sensitive edges (optional) combined with maximum pressure relief valves that limit the maximum value of the hydraulic pressure in the presence of obstacles (adjustable during installation).

Ideal for heavy workloads in the presence of large-sized up-and-over doors.

Locks on opening and closing (double lock): the door remains shut without installing further locks.

AT 50 can be easily installed without modifying the up-and-over doors.

Very high resistance to shocks and stress during operation thanks to the ductile cast iron body.

Great hydraulic sealing thanks to internal scrapers.

Silent and regular performance guaranteed by polyurethane seals and P.T.E. guide rings.

MAXIMUM DOOR SIZE	12 m ²	14 m ²
DIMENSIONS (mm)	400x250x150	400x250x150
WEIGHT OPERATOR	15 Kg	16 Kg

Maximum anti-crushing safety thanks to the on-board electronic control unit equipped with auto reverse safety system when an obstacle is detected while closing the gate and to the use of sensitive edges.

The kit **GA-MATIC** can be used for sectional doors and when installed with the accessory adapter arm, even to automate up-and-over doors.

Slowdown system for a soft approach of the door during opening and closing, thus avoiding noise and mechanical stress to the structure.

Timed courtesy light built into the operator to light up the garage during opening and closing.

The **pre-assembled guides** optimise installation time, while the encoder-controlled stroke simplifies the configuration phase.

Silent and resistant thanks to the belt drive.

Continuity of operation guaranteed, in the event of power supply failure, by a set of optional batteries which may be fitted inside the operator casing. Possibility of manual operation via the release system (optional).

ANTI-CRUSHING	YES
WEIGHT BARRIER	40 Kg

Easy access for wiring and configuration in the upper part of the barrier.

User-friendly electronics: no configuration is required for basic use. Parameters are easy to check and set.

Easy to install: simple installation and configuration. IT is only necessary to balance the spring.

Reduced dimensions and next-generation design: long and narrow shape.

High intensity of use: suitable for the control of vehicular access for small/medium car parks for private use.

Main technical solutions adopted:

1. Super smooth action thanks to the spring-loaded balancing system.
2. Strong construction featuring a metal load-bearing framework.

3. Release system with customised key.
4. The electronic control unit is housed in a protective plastic casing with easy access from the top.
5. Ready for "master-slave" mode for twin barrier operation.

INSTALLATION ACCESSORIES

ELECTRONIC CONTROL UNITS

Aprimatic control units ensure reliability and durability thanks to the careful design and selection of the best components available and offer the highest technological

content, together with a variety of features. Prestigious third-party laboratories perform compliance testing required for EC marking and certify the

compliance of the equipment with the requirements imposed by European standards for electrical safety and electromagnetic compatibility.

Top quality electronic and electromechanical components and careful circuit design for exceptional interference immunity.

Spike filters built onto the card for high protection against mains disturbances.

Voltage stabilisers dedicated to logic circuits and power on/reset circuits to protect against fluctuations and transient power failures.

Zero-crossing **power triacs** to minimise interference and to guarantee perfect operation and a long working life of the equipment.

Short circuit and overload **protection fuses** for 24Vdc transformers, motors and accessories.

Boards, circuits, power components and heat sinks all dimensioned to guarantee trouble-free operation even in continuous use at maximum nominal power.

Compact board size to leave plenty of room for wiring and to ensure easy installation and maintenance.

Numbered and mechanically polarised **removable terminal boards** to guarantee easy wiring and safe connections. Plug-in connectors for easy installation of receivers and optional boards.

Boxes fitted with locking devices operated by a special key supplied as standard, and seals with **IP55** protection degree for high resistance to atmospheric agents.

ACCESS CONTROL MEMORY SYSTEM 433.92

MEMORY SYSTEM is the perfect radio access control solution for residential and industrial buildings, condominiums, car-parks, clubs, tourist ports and other community applications. Technology, design and special dedicated access control functions make of Memory System an indispensable tool for advanced installers wishing to attract new customers by guaranteeing maximum security. Memory System's access management functions make it far more than just another remote opening system and allow installations to be managed with far greater professionalism and skill.

4- and 14-KEY ROLLING CODE REMOTE CONTROLS

- A single code set from 72,000,000,000,000,000 possible combinations guarantees maximum user security.
- Attractive, stylish design in clear orange and red, and excellent ergonomics.

UNICO MEMORY SYSTEM RECEIVERS

Memory System receivers represent a unique hardware and software solution and can be expanded with up to 4 channels.

They are suitable for all installation types and all access control requirements.

- 24 Vdc / Vac power supply, low consumption (20 mA max. in stand by).
- 104 dBm sensitivity, range from 40 to 120 m, front end radio frequency input filter.
- Hopping / rolling code decoding system.
- Radio code self-learning, beeper and flasher for code recognition.
- Standard removable memory module for up to 496 different codes. Optional module for over 2,000 codes.
- Standard relay output and relay modules for up to 3 expansion channels with 4 operating modes: pulse, hold, step-by-step, and timer with programmable 1-255 second duration.

APRITool HAND-HELD CONFIGURATION TOOL

A portable hand-held configuration tool capable of installer code configuration, renewal, disabling and cancelling even wirelessly; active channel selective disabling for each individual code; access management configuration (base, easy, special, super); data storage on receiver memory modules; update download onto a PC.

APRIBASE1 CONFIGURATION BASE

A configuration base for remote controls, receivers and memory modules. For use in conjunction with Apricot Manager software or the Apritool configuration tool. Complete with serial cable for connection to a PC or to the Apritool configuration tool.

APRICOT MANAGER ACCESS MANAGEMENT SOFTWARE

Apricot Manager software allows installers to make full, simple and intuitive use of all Memory System access management functions (user identification, lost code cancellation, hierarchic access control, etc.). The powerful database also allows you to archive all installation data for easier maintenance and warranty management etc.

REMOTE CONTROLS AND RECEIVERS

MEMORY SYSTEM 433.92 MHZ

	ITEM NUMBER	DESCRIPTION	€
	41905/004	TM4 - 433.92 MHz four-channel rolling code remote control	38,41
	41903/014	TR14 - 433.92 MHz 14-channel remote control with function keys that can be customised using the Apricot RC Customizer	282,63
	41923/009	RR SE - Unico 433.92 MHz Memory System receiver (narrow-band superheterodyne version) with built-in antenna	88,67
	41929/001	ANT433 - 433.92 MHz antenna with 4.5 m coax cable and ground connection to be used as external antenna for 41923/009 receiver	19,12

ACCESSORIES FOR UNICO MEMORY SYSTEM RECEIVER 41923/009

	ITEM NUMBER	DESCRIPTION	€
	41923/052	CA41 - Expansion relay module for additional channel	22,01
	41923/053	CA43 - Expansion relay module for 3 additional channels	35,93
	41923/051	MM2 - Optional removable memory module up to 2,032 codes	101,99
	41923/059	CR44 - IP44 container for outdoor installation	9,83
	41706/007	CA2 - Expansion relay card (multiple package with 6 pcs.)	17,86

NOTE: All prices are subject to variation

PORTABLE HAND-HELD CONFIGURATION TOOLS

APRIBASE 1

CONFIGURATION TOOL AND CONFIGURATION BASE FOR REMOTE CONTROLS AND RECEIVERS

Customise Installer code and System code. Select access management functions. Select receiver output channel functions: pulse, hold, step-by-step and timer with 1-255 s programmable duration. Configure codes in memory modules or internal buffers. Configure remote controls with code customisation.

Read remote controls. Identify, read, edit and transfer data to and from memory modules. Cancel and disable memory module codes. Edit memory module function parameters. Program remote controls to duplicate, replace and disable codes by radio. Transfer data to and from PC.

HAND-HELD CONFIGURATION TOOL

ITEM NUMBER	DESCRIPTION	€
41930/005	The APRITool hand-held configuration tool must always be combined with APRIBASE1	2.494,35
41930/001	Apribase 1 - Configuration base for memory modules and remote controls, complete with power unit and battery charger for configuration tool	1.385,47

41930/102

Configuration cable for use with the TM4 41905/004 transmitter

77,22

APRICOT SOFTWARE

**APRICOT MANAGER**

is the software allowing to make full and simple use of all Memory System access management functions. It is also a very useful tool allowing the installer to store customer and system data, thus facilitating maintenance operations, warranty management etc. Using Apricot Manager does not require any particular IT skills. The window-based interface allows to perform all operations in a simple and intuitive way.

The software is supplied on a self-installing CD-ROM for PC with the following operating systems: Windows 95, 97, 2000, NT. Any prohibited or potentially dangerous operations that could compromise the integrity of stored data are protected against operator errors. Access to the application is protected by a password that can be customised by the user. Installation is protected with unique user number for each support.

COMMON ACCESSORIES

ITEM NUMBER	DESCRIPTION	€
41930/009	Apricot Manager, Windows XP version (multi-language) - Access control Software on self-installing CD-ROM only for PC with Windows XP operating system (No Notebook) always in combination with APRIBASE1	591,30

Note : Ask availability to Customer Service.
NOTE: All prices are subject to variation

OTHER ACCESS CONTROL SYSTEMS

PROXIMITY READERS

PR5
New access control reader with proximity-reader technology. The PR5 proximity reader works with the practical keychain Tag or ISO badge. PR5 is easily installed even on existing systems, replacing existing Aprimatic readers (CT/4, LB/4, ...) because it is mounted on the same mechanics.
Reading distance: 5 cm
Decoder connection: 3-wire bus.

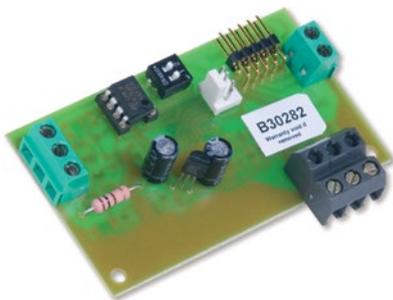

TAG
Proximity keychain tag.
Reading distance 5-8 cm.

	ITEM NUMBER	DESCRIPTION	€
	41820/001	PR5 - Proximity reader always in combination with the DEC/A 41820/050 decoding card	137,36
	41820/051	Proximity keychain TAG*, reading distance 5-8 cm	9,83
	41820/053	Proximity ISO badge TAG*	9,22

* For multiple purchases, always consider 1 extra TAG to be used as a Master.

DECODER

DEC/A
Decoder card with 256 codes for access control systems. Plug-in installation on Aprimatic control units. DEC/A is compatible with the PR5 proximity sensor; CT4 keypad and LB4 magnetic card reader. It replaces the previous range of Aprimatic decoders (DC/3 and DB/4).

TECHNICAL DATA

POWER SUPPLY	24 Vdc ± 15%
INSTALLATION	Plug-in
NUMBER OF STORABLE CODES	256
READER CONNECTION	3-wire bus
DIMENSIONS	mm 105x65x30

ITEM NUMBER	DESCRIPTION	€
41820/050	DEC/A - Access control decoder with 256 codes	85,77

NOTE: All prices are subject to variation

KEYBOARD COMBINATION LOCK

	ITEM NUMBER	DESCRIPTION	€
	41800/002	CT4 - Electronic keyboard combination lock with capacitive keypad for over 2 billion possible combinations, data transmission on serial cable between the keyboard and the decoding card ensures tamper-proof protection. Always in combination with the DEC/A 41820/050 decoding card.	114,75

CARD AND MAGNETIC KEY READERS

	ITEM NUMBER	DESCRIPTION	€
	41821/001	LB4 - Tamper-proof magnetic card reader with over 2 billion possible combinations, data transmission on a serial cable between the reader and the decoding card ensures tamper-proof protection. Always in combination with the DEC/A 41820/050 decoding card.	220,23
	41821/048	SB4/C - Coded magnetic card (badge)	4,89

* Item out-of stock. Request availability to back Office

ANTI-TAMPER KEY-OPERATED SWITCHES

	ITEM NUMBER	DESCRIPTION	€
	41830/006	PM12 - Two-contact metal key-operated switch for wall- or post-mounting	36,63
	41830/005	PC12 - Two-contact key-operated switch, accessories are available for recessed post- and wall-mounting and for external wall- and post-mounting	27,81
	41830/007	PC12E - Two-contact key-operated switch, accessories are available for recessed post and wall-mounting and for external wall and post-mounting	27,81

NOTE: All prices are subject to variation

OPTIONAL ACCESSORIES FOR PR5; CT4; LB4; PC12; PM12 AND PC12E

			LB4 41821/001	CT4 41800/002	PR5 41820/001	PC12 41830/005	PM12 41830/006	PC12E 41830/007
	€							
41830/051	46,68	H= 110 cm

41830/055	57,37	H= 110 cm						
Aluminium post for PC12E key-operated switch (height 110 cm)								●
41830/053	2,87							
Plastic container for recessed wall-mounting (pack of 6 pcs)			●	●	●	●		
41830/050	15,00							
PC12 Metal container to be welded			●	●	●	●		
41830/054	10,03							
Metal container to be welded (pack of 8 pcs)			●	●	●	●		

	ITEM NUMBER	DESCRIPTION	€
	41812/051	Base plate for 41830/051 or 41830/055 post mounting (pack of 4 pcs)	11,32
	41830/052	Bracket for metal pillar connection complete with screws to be matched to 41830/050 or 41830/054 metal container (pack of 4 pcs)	5,20

FLASHING LIGHTS

Yellow light indicators always visible at a distance in all weather conditions. Made of polycarbonate, they have a high degree of mechanical resistance to impacts.

ITEM NUMBER	DESCRIPTION	€
41840/006*	ET 2N - 24 V LED flashing light	42,30
41841/009*	ET 20N - 230 V single flashing lamp	32,45
41841/001	ET 22 - 230 V double flashing lamp	62,59
41929/003	433.92 MHz antenna kit for ET2N and ET20N	18,48

* Sold without antenna kit

NOTE: All prices are subject to variation

METAL DETECTOR

	ITEM NUMBER	DESCRIPTION	€
	41801/004	230 V single channel Loop Detector	272,40
	41801/005	230 V two-channel Loop Detector	346,24

STRAIGHT EDGES

Straight edges consist of an aluminium support profile with a rubber profile containing the steel cable system for obstacle detection.

ITEM NUMBER	DESCRIPTION	€
41850/002	CF1M - 1.5 m straight safety edge	75,57
41850/003	CF2M - 2.0 m straight safety edge	80,46
41850/004	CF3M - 3.0 m straight safety edge	87,56
41850/001	CF3MS - 3.0 m straight safety edge (thin and specific for garage doors)	79,19

RADIO BAND

TBX 868 MHz

RU 868 MHz

Radio signalling devices of safety edges on automatic accesses. The Radio Band system establishes a constant dialogue between emitter and receiver at a frequency of 868 MHz, with continuous auto-test. Each receiver manages as many as 6 transmitters.

ITEM NUMBER	DESCRIPTION	€
41906/001	TBX 868 MHz - Radio Band transmitter	150,68
41926/001	RU 868 MHz - Radio Band receiver	170,96

OPTIONAL POWER UNITS

	ITEM NUMBER	DESCRIPTION	€
	41703/002	AL1 - 24 Vdc 500 mA power unit for independent control of electric locks, relays, CT4 keyboard combination lock, LB4 badge reader, with preset connection for DC/3 and DB/4 decoding cards	103,17
	41703/001	24 Vdc 250 mA power unit for safety devices and accessories - dimensions Ø 50 mm, h 30 mm, can be installed in 3-module flush-mounting boxes	46,93

NOTE: All prices are subject to variation

PHOTOCELLS

**ER12-24V - MINI PHOTOCELLS FOR WALL-MOUNTING**

The ER12-24V photocells, with 20-m maximum range, are designed to be welded onto a post or wall-mounted and require no recess. The elements are self-aligning and therefore need no adjustments.

The transmitter and receiver are infrared-modulated and therefore unaffected by sun disturbances or bright direct light. IP45 protection degree guaranteed by a special rubber seal that prevents water infiltrations.

ITEM NUMBER	DESCRIPTION	€
41812/008	ER12-24V - Modulated infrared photocells, 12-24 Vac power supply, for post- or wall-mounting	71,16

**ER2N - PHOTOCELLS FOR RECESSED MOUNTING**

ER2N photocells are equipped with an adjustment system that keeps them perfectly aligned. The modulated infrared beam makes them unaffected by sun disturbances or bright direct light.

ITEM NUMBER	DESCRIPTION	€
41811/001	ER2N - Modulated infrared photocells, 24 Vdc/Vac, for post mounting, recessed mounting or inside a container to be welded, max. range 40 m	95,62

REFLEX PHOTOCELLS

**REFLEX - PHOTOCELL WITH REFLECTION OF POLARISED LIGHT FOR AUTOMATIC GATES.**

Quick installation (on wall or support post) because it requires wiring only to one end of the gate; the round reflector must be secured at the same height as the photocell, on the other end of the gate. Extremely reliable, because it can detect even highly reflective objects,

such as mirrors or glossy surfaces. Extremely easy photocell alignment: thanks to the analogue pointing LED, finding the best efficiency point is easy. An optional accessory is available to protect the reflector from bumps and splashes.

ITEM NUMBER	DESCRIPTION	€
41810/002	REFLEX - Photocell with reflection of polarised light	97,94
41810/050	Reflector protection	12,95

TECHNICAL DATA

POWER SUPPLY	24 Vdc / Vac
MAX. ABSORBED POWER	3 W
MAX. RANGE RECEIVER RELAY CONTACT	1A - 24 Vdc for resistive loads; 0.5A - 24Vdc for non-resistive loads
INTERVENTION TIME	20 ms
MAX. OPERATING DISTANCE	nominal 12 m
OPERATING TEMPERATURE	-15° +70° C
RELATIVE HUMIDITY	< 90% non condensing
LIGHT REJECTION	20000 lux
PROTECTION DEGREE	IP 45
APPLICATION FIELD	For use in protected environments (indoors, under porches, etc.)

NOTE: All prices are subject to variation

PHOTOCELLS

**ER180B - BATTERY-POWERED PHOTOCELLS FOR WALL-MOUNTING**

The ER180B photocells are equipped with lenses adjustable up to 180°. The TX transmitter is powered by 2 1.5V batteries (2 x AAA or LR03)

with a maximum duration of 30 months. The RX receiver is powered by a 12-24 Vac/dc current through the system's electronic control unit.

ITEM NUMBER	DESCRIPTION	€
41817/001	ER180B - Battery-powered photocells, 12-24Vac/dc, for wall-mounting, max. range 20 m	101,99

DESCRIPTION OF OPTIONAL ACCESSORIES FOR REFLEX, ER12-24V, ER2N PHOTOCELLS

		ER12-24V 41812/008	REFLEX 41810/002	ER2N 41811/001
	€			
41811/050	35,93			
Galvanised post for ER2N photocells (height 51 cm)	H= 51 cm

ROLLING SHUTTERS

TYPES

ROLLING SHUTTER MOTORS

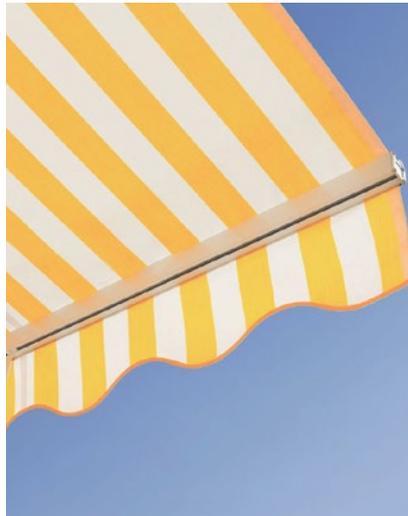

Automation system used for standard rolling shutters or rolling shutters with container.

Revolux 35 series
Revolux 35 Wireless series
Revolux 45 series
Revolux 45 Wireless series
Revolux 59 series

BLIND MOTORS

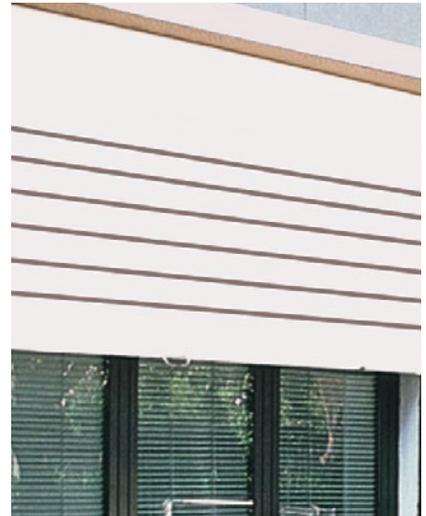

Automation system used for technical fabric curtains, which can be installed in small premises as a sun-block, or as a projector screen. The same can be fitted on folding-arm sun blinds.

Revolux 35 series
Revolux 35 Wireless series
Revolux 45 series
Revolux 45 Wireless series
Revolux 59 series
Revolux 92 series

ROLLING GATE MOTORS

Automation system used for closing premises used for residential and commercial use.

RO-MATIC RS140 series
RO-MATIC RS180 series

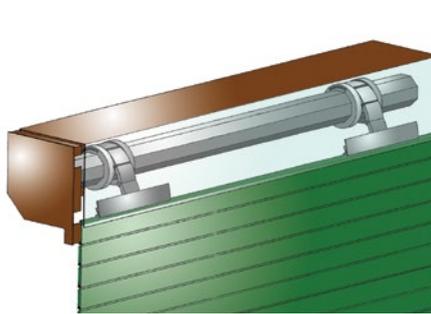

SHUTTERS AND SUN BLINDS: TYPICAL SYSTEM COMPOSITION

1) Operator with and without on-board receiver: device that allows powering a rolling shutter or sun blind with an external power supply

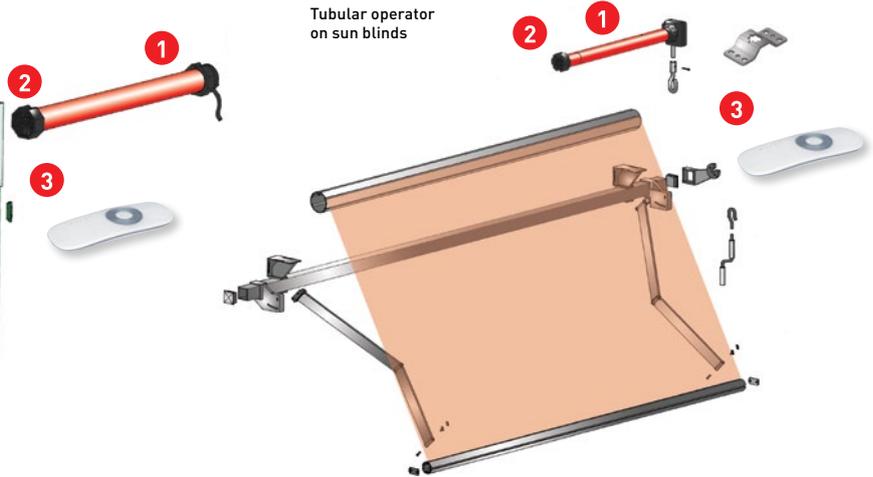

2) Accessories for installing/fixing the motor;

3) Transmitter: wireless equipment that transmits information to the control unit.

Tubular operator on rolling shutter

Tubular operator on sun blinds

ROLLING GATES: TYPICAL SYSTEM COMPOSITION

1) Operator: device for shutter operation with an external power supply.
2) Control unit: electronic unit for handling the operator movement.
3) Transmitter: wireless equipment that transmits information to the control unit.

4) Antenna: device that increases the reception of the signals sent by the transmitter.
5) Flashing light: light signalling that the automation is moving.
6) Pair of photocells: safety devices stopping automation movement in the presence of obstacles.

7) Control unit: allows to activate the movement of the automation through a mechanical or electronic key.

THE RANGE

Aprimatic's range of tubular motors for rolling shutters and sun blinds is extremely reliable, fast, and silent and offers performance to satisfy even the most demanding users. Available with wired or wireless controls.

SMS model: without emergency operation (ideal for rolling shutters)

CMS model: with emergency operation (ideal for sun blinds). Device allowing, with the necessary accessories, to perform manual operation with the relevant rod.

Models with mechanical limit stops: easy adjustment facilitated by the presence of 2 mechanical settings on the motor head.

Models with electronic limit stops: limit stop adjustment via electric pulse

REVOLUX TUBULAR MOTORS

Tubular motors for rolling shutters and sun blinds.

ROLLER KIT REVOLUX

SERIES 35 TUBULAR MOTORS WITHOUT EMERGENCY OPERATION

SERIES 45S SHORT TUBULAR MOTORS WITHOUT EMERGENCY OPERATION

SERIES 45 TUBULAR MOTORS WITHOUT EMERGENCY OPERATION

SERIES 45 TUBULAR MOTORS WITH EMERGENCY OPERATION

SERIES 59 TUBULAR MOTORS WITHOUT EMERGENCY OPERATION

SERIES 59 TUBULAR MOTORS WITH EMERGENCY OPERATION

SERIES 92 TUBULAR MOTORS WITH EMERGENCY OPERATION

SERIES 92 TUBULAR MOTORS WITHOUT EMERGENCY OPERATION

RO-MATIC RS140 / RS180

Operator for rolling gates, for residential use.

New series 92 motors: the best solution for the automation of rolling gates or mesh gates (weighing up to max. 350 kg).

NEW WIRELESS SYSTEMS

The entire range of Aprimatic Revolux, known for its performance and reliability, is now available in a wireless version, with built-in receiver.

Available new MP version tubular motors, with built-in receiver for the management of the movement of adjustable shutters.

*MP Multiposition - motor with 3 limit switch for the management of the movement of adjustable shutters, with integrated receiver.

CHOOSING THE RIGHT PRODUCT ROLLING SHUTTER AUTOMATION SYSTEMS

$$\text{WEIGHT} = \frac{\text{Nominal motor torque (Nm)}}{\text{Lifting lever (m)}}$$

The nominal motor torque in Nm (Newton metre) is indicated on the motor label. The lifting force is obtained by adding the radius of the winding roller (R1 in the drawing) and half the thickness of the shutter (R2 in the drawing) or half the length of the rope supporting the applied weight.

EXAMPLE IN METRES

Motor rated torque 45 Nm
 Pipe diameter 60 mm - R1 = 30 mm (0.030 m)
 Shutter thickness 10 mm - R2 = 5 mm (0.005 m)

$$\text{WEIGHT} = \frac{45 \text{ Nm}}{0,030 \text{ m} + 0,005} = \frac{45 \text{ Nm}}{0,035 \text{ m}} = 1285 \text{ N} \quad 9,81 \text{ N} = 1 \text{ kg} \quad \rightarrow \quad \text{WEIGHT} = \frac{1285 \text{ Nm}}{9,81} = 131 \text{ kg}$$

This motor can lift a free weight of 131 kg. However, application on window frames and rolling shutters requires safety coefficients of up to 50%. Therefore the maximum weight that can be lifted by the motor must be divided in half, and thus is 65 kg.

The tables to the side allow the selection of a motor in relation to the diameter of the winding roller and the weight of the rolling shutter. The weight of the rolling shutter in kg can be obtained by multiplying the area by the weight per m² of the material it is made of.

WARNING

The weights shown in the tables are calculated with a 50% margin (considering friction, winding diameter increase, etc.). Oversizing or downsizing the motor is not recommended.

5	Rod for manual emergency operation		139

REVOLUX TUBULAR MOTORS

Tubular motors for rolling shutters and sun blinds.

The motors can be combined with ADI control units, thus allowing the creation of fully-automated systems even with radio controls.

The wide availability of adapters and installation accessories allows to meet any application requirement.

3 automation kits are available for 30 kg, 60 kg and 90 kg shutters respectively, complete with accessories for installation.

The motors of the series 45, 59 and 92 are also available in CSM versions, i.e., equipped with emergency operation for manual opening in case of power supply failure.

Engine equipped with a 1.9 m cable for electrical connection. A simple device allows easy and accurate limit stop adjustment.

TECHNICAL DATA

SERIES	MODEL (S without emergency operation) (M with emergency operation)	TORQUE (Nm)	POWER (W)	SPEED (rpm)	DIAMETER (Ø)
35	35S 10Nm/17	10	121	17	35
	35S 6Nm/28F	6	121	28	35
45	45S 20Nm - 45M 20Nm	20	145	15	45
	45S 30Nm - 45M 30Nm	30	191	15	45
	45S 50Nm - 45M 50Nm	50	191	12	45
59	59S 80Nm - 59M 80Nm	80	298	15	60
	59S 100Nm - 59M 100Nm	100	305	12	60
	59S 120Nm - 59M 120Nm	120	305	9	60
92	92S 230Nm - 92M 230Nm	230	602	12	92

For all 45 and 59 series models, the operating time is 4 minutes.

MAX. WING WEIGHT	80 kg	50 kg x 2

NOTE: Frictions are included in the weights.

Maximum reliability and great flexibility.

Buongiorno is an automation system for side-hinged shutters. It can be used with any type of window including those fitted with security grates and mosquito screens. It consists of an aluminium beam which acts as a support for the gear motor (two in two-wing applications) and a PVC guard. The beam and guard can be cut to size to enable application with shutters of varying sizes. **Buongiorno** is easy to install without modifying the existing shutters or carry out masonry work.

Absolute comfort.

Buongiorno enables you to open and close the shutters in your home without opening the windows simply by pressing a button.

Buongiorno is ideal for opening and closing your shutters in winter, in cold weather, in summer, even if your windows have mosquito screens or are difficult to reach.

Security and durability.

Buongiorno is fitted with an electronic clutch that behaves intelligently depending on the absorbed current. The shutter stops if it meets an obstacle during movement thus protecting the user and the gear motor. Thanks to this device, the installer does not have to make any limit stop adjustments. In the event of mains power supply failure, the user can open or close the shutter immediately without unlocking it. An electric lock can also be fitted on demand for increased security.

WI-MATIC ATC300E

Electromechanical operator for windows with double layer chain, ideal for outward-opening windows.

TECHNICAL FEATURES

POWER SUPPLY	100-240 Vca 50/60 Hz
ABSORBED CURRENT	0,15 A
RATED POWER	28 W
PUSH/PULL FORCE	250 N / 250 N
SPEED	10 mm/s
ADJUSTABLE STROKES FROM	100-400 mm
TEMPERATURE	-20°+60°
SIZE OPERATOR	(LxHxP) 460 x 42 x 56 mm
SIZE WINDOWS	1600 mm MAX
IP CLASS	IP42
PARALLEL CONNECTION	Yes, with 1 motor for each frame
OPERATOR WEIGHT	1.8KG

Wide voltage 100-240Vca power input, suitable for all country's different requests.

Rocker brackets for long runs even on small frames. They also allow the operator suitable to a wide range of applications.

The race is easily adjusted through a simple rotation from the outside of the operator so you don't need to open anything.

Adjustable running, from 100 up to 400mm

Double layers stainless metal chain alloy steel that ensure maximum strength.

Very smooth running
Applications bottom hinged or roof-domes bracket available separately.

Slim dimensions and compact shape

make this product easy to integrate with the window frame regardless of its thickness or design.

Aluminum casing with oxidation treatment satin to give maximum strength and aesthetics. Operator quiet thanks to the extremely robust structure that prevents vibration.

Special surface treatment to give an excellent resistance to oxidation. Excellent finishes too.

i 231

i 221

Electromechanical operator for windows with double chain, ideal for outward-opening windows, bottom-hinged windows and domes.

TECHNICAL DATA	24 Vdc
POWER SUPPLY	24 Vdc
ABSORBED POWER	50 W
ABSORBED CURRENT	2 A
THRUST FORCE	350 N (stroke 150 mm) 250 N (stroke 250 mm) 100 N (stroke 380 mm)
TRACTION FORCE	350 N
ADJUSTABLE STROKES	150 mm, 250 mm, 380 mm, special stroke (0÷380mm)
SHIFTING SPEED	24 mm/s
OPERATING TEMPERATURE	-5° +55° C
FRONT ADJUSTMENT	max. 10 mm
PARALLEL CONNECTION	YES (max 1 operator per window)
OVERLOAD PROTECTION	100° C
DIMENSIONS	(LxHxP) 340x40x80 mm
LIMITS OF USE	non-intensive (continuous operation MAX 4 min)
PROTECTION DEGREE	IP54
OPERATOR WEIGHT	1,2 Kg

Is a flexible, powerful and reliable product. These features make it unique in the market of window operators.

The special fixing device enables the installer to easily adjust the position of the operator on the frame.

Thanks to its thrust force and double chain, it can push and pull very heavy windows.

A dedicated software allows to reset the closing point automatically every 50 opening and closing operations. Thus, the window's heat insulation and soundproofing properties are not compromised.

The highest protection degree in its category, IP54, is a guarantee of good operation even for applications that are significantly exposed to atmospheric agents.

Smaller dimensions and a compact shape make this product easy to integrate with the window frame regardless of its thickness or design.

VARIA

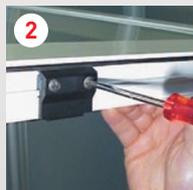

VARIA T

Installation of the operator bracket to the counter-frame

Installation of the chain coupling to the mobile wing

Installation of the apricolor varia operator to the counter-frame

APRICOLOR VARIA

i222

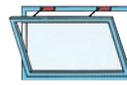

Chain operator for bottom-hinged and outward-opening windows.

TECHNICAL DATA

POWER SUPPLY	230 Vca - 24 Vcc
ABSORBED POWER	150 W - 40 W
ABSORBED CURRENT	0,8A in ca/1,8 in cc
THRUST FORCE	150 N
TRACTION FORCE	300 N
ADJUSTABLE STROKES	from 90 to 400 mm
SHIFTING SPEED	40 mm/s
FRONT ADJUSTMENT	max. 10 mm
PARALLEL CONNECTION	YES
OVERLOAD PROTECTION	100° C (only 230 V versions)
CAPACITOR	4 µF
BUILT-IN RELAY	YES
LIGHT INDICATOR	YES
REMOVABLE TERMINAL BOARD	YES
PROTECTION DEGREE	IP20
OPERATOR WEIGHT	1.7 Kg

NOTE: Use of the Varia actuator still requires (compulsorily) the application of safety arms on the windows.

Exclusive quick-fit system securing the operator to the frame.

Apricolor VARIA is an electromechanical chain operator with internal nylon magazine.

It is suitable for bottom-hinged and outward-opening applications, and features an adjustable stroke from 90 to 400 mm.

230 V and 24 V operation. It can be connected in parallel. The chain is rust-proof thanks to the Dacro-met coating.

Apricolor VARIA T is designed for twin-mounting on single windows with width over 1600 mm. Apricolor VARIA T stands out for its overload protection, shared between the two parallel-connected operators. If one of the two trips, the other stops its motion, thus protecting the frame from torsional stresses.

OPERATOR WEIGHT	2.0 Kg

Innovative magnetic limit stop detection system without moving mechanical parts: it further increases product reliability in any working condition.

Product dimensions are designed to be as compact as possible to ensure an installation that blends with the rest of the building.

Silent operation and speed are the two strengths of the ST 450N operator.

Can be connected in parallel thanks to the relay built into the card.

Electronic operator in aluminium casing with straight-arm linear movement.

230 Vac power supply with overload protection. Max. stroke 300 mm. Available accessory: Kit for limit stop adjustment. Features a reed switch system without moving mechanical parts. Brackets and supports are supplied for the required application.

PROTECTION DEGREE	IP55	IP55

Aprilineare serie are windows operators for vertical sunblinds, domes or applications that required on the frame one thrust point.

Duo System and Try System are ideal for use with automation systems for large domes, outward-opening windows and large skylights. They are valid alternatives in applications requiring two or three thrust points.

Duo and Try system have perfect balance and therefore evenly- distributed movement are obtained, even with large frames, by exploiting **the power and reliability** of a motor unit combined with one or two more thrust units.

Electric anodised aluminium operators with rack-driven linear movement, fitted with an electronic limit stop, IP55 protection degree, anodised aluminium bracket and galvanised steel frame mount. The operators can be connected in parallel.

The rack is made of C43 galvanised steel, and has a 10 x 10 square section. The box is made of two pieces of sealed impact-proof ABS. The operators are fitted with an internal cable.

The motor Duo System Can be used in conjunction with the TRY drive units made of anodised aluminium and consisting of: a C43 galvanised steel rack with 10 x 10 square section complete with anodised aluminium bracket and galvanised steel frame mount. The drive pipes for connection to two or three thrust points are made of anodised aluminium and are supplied complete with fixing screws.

520/600RF - 520/700RF

Systems for remote automation of windows.

ELEMENTS OF THE SYSTEM:

- 1- Gear motor unit
- 2- Limit stop device
- 3- Rotary shaft
- 4- Shaft support bracket
- 5- Rack rail
- 6- Frame mount with spring compensator

- 1 - Rack rail for bottom-hinged or outward-opening applications:
 - Spring compensator (pull or push)
 - Sprocket for rotary shaft (\varnothing 27-33-42 mm)
- 2 - Standard bracket running on ball bearings for rotary shaft support (\varnothing 27-33-42 mm)
- 3 - Counter-bracket (length 140-210 mm)
- 4 - Galvanised rotary shaft (\varnothing 27-33-42 mm)
- 5 - Joint with coupling pin for rotary shaft (\varnothing 27-33-42 mm).

The new 520/600RF and 520/700RF systems have been designed to solve the problems represented by remotely opening and closing bottom-hinged or outward-opening windows, whether installed individually or in rows, also in long rows of windows, skylights, in breeding farms or greenhouses.

The windows are opened and closed by a series of rack rails running on a toothed sprocket, driven by a shaft, which in turn is turned by a gear unit.

The transmission of the rotational movement from the gear unit to the shaft, and from each element to the next on the shaft is guaranteed by joints with bolts and coupling pin.

The spring compensator on the end of the rack may be of the pulling or pushing type depending on which way the windows close, and guarantees even pressure on the window frames.

The rotary shaft **support brackets** run on ball bearings and have adjustment slots. They can also be fitted with counter-brackets. Available for shafts with diameters of 27-33-42 mm.

The rack rails feature brass toothed sprockets, which must be fixed to the rotary shaft using the relevant press-fit bolts.

The bracket, to screw onto the window, is held on the rack with a practical spring-loaded pin.

520/600RF Motor

520/700RF Motor

APRICOP MOTOR

Electrical gear unit with single-phase motor coupled to a self-locking worm screw gear unit.
With limit stop.

520 SERIES MOTORS

The 520 series motors have a three-phase motor coupled to a steel self-locking worm screw gear unit with bronze machined-from-solid gears in a cast iron self-lubricated casing.

The low-speed shaft has two protuberances with holes and a slot on both ends, so that it can be positioned in the centre or at one end of the gear unit.

The rotary limit stops are fast-acting and adjustable, and are fitted on one of the two hubs of the low-speed shaft, with an aluminium protective cover.

AUTOMATION SYSTEMS FOR SLIDING DOORS

**WING NK / WING NK H150 / SLIM SNK****Smooth, accurate, silent movement.**

Aprimatic offers a wide range of automation solutions for sliding doors. Products designed to provide top reliability in a wide range of applications for offices, shops and supermarkets.

All automation components feature compact, attractively designed extruded aluminium housings. The units are easy to install and do not require specialised skills or masonry work.

The automation units are equipped with intelligent electronic control systems which require very few adjustments. This makes for quicker installation and easier maintenance operations, while guaranteeing total safety.

Drive system with a toothed HPPD rubber drive belt. The belt is reinforced with a glass fibre core and has a non-slip coating. Modular carriages with large-diameter reinforced-nylon wheels running on upper and lower semicircular cross-section rails. The carriage modules feature an anti-derailment, anti-pitching, load-balancing system. Reversible DC Gear motor with electronic pulse width control. 2-channel optical encoder connected

to the motor for electronic position and speed control. The control units ensure the highest levels of safety and reliability. Performance features include: stroke length, wing weight, braking force and braking distance self-learning. They also guarantee the emergency battery charge. Compact and aesthetically pleasing aluminium profile covers, available in natural, anodised silver and anodised black versions.

Wing NK

Reversible single-motor automation for sliding doors. Suitable for shops, supermarkets and offices with high traffic levels. Designed for medium-heavy loads.

Max. load for heavy-duty use (4 cycles/min.):
For 2 wings, 100 kg each for one wing 150 kg.
Max. load for continuous use (6 cycles/min.):
For 2 wings, 80 kg each for one wing 130 kg.

Wing NK H150

New reversible single-motor automation for sliding doors. Suitable for shops, supermarkets and offices with high traffic levels. Designed for medium-heavy loads.

Max. load for heavy-duty use (4 cycles/min.):
For 2 wings, 150 kg each for one wing 150 kg.
Max. load for continuous use (6 cycles/min.):
For 2 wings, 130 kg each for one wing 150 kg.

Slim SNK

Reversible single-motor automation for sliding doors. Suitable for shops, supermarkets and offices with medium traffic levels and medium-light loads.

Max. load for NON intensive use (<3 cycles/min.):
For 2 wings 70 kg each, for one wing 100 kg.
Max. load for heavy-duty use (4 cycles/min.):
For 2 wings, 50 kg each for one wing 70 kg.

VP	$2(A-S)$	~	$(T-2S-10)/2$
A	~	$(VP+2S)/2$	$(T+2S-10)/4$

	Known A	Known VP	Known T
T	$2A-2S+10$	$2VP+2S+10$	~
VP	$A-2S$	~	$(T-2S-10)/2$
A	~	$VP+2S$	$(T+2S-10)/2$

	Known A	Known VP	Known T
T	$2A-S+10$	$2VP+S+10$	~
VP	$A-S$	~	$(T-S-10)/2$
A	~	$VP+2S$	$(T+S-10)/2$

A = wing length in mm

VP = passage span in mm

T = beam length in mm

S = overlap in mm

NOTE: S - The overlap (S) used in the formula = 50 mm (not binding).

The calculations for RH and LH single-wing automation systems are valid for both opening directions.

For RH single-wing automation, the actual passage span (VP) of the automation is reduced by the size of the overlap selected.

MODULAR SOLUTIONS

WING NK / SLIM SNK modules

**Composition**

The WING NK and SLIM SNK modules consists of a module profile L=1,100 mm complete with pre-assembled components: control unit, power supply unit, motor with encoder, emergency batteries. The Module pack also includes an idle pulley and two side flanges.

These modules allow to construct any type of "Wing NK", "Wing NK H150" or "SLIM SNK" automation systems with the same technical characteristics and functions as

described above. The NK module profile is supplied ready for installation, complete with the control unit, power supply unit, motor and batteries ready-assembled.

To complete an automation you will need the following: the "L" beam (of convenient length), the hardware kit; the toothed belt and the cover.

KIT UPGRADE WING NK

**Application range:**

The WING NK upgrade kit can only be installed on: **Automatic doors of the WING or WING EVO model** on the catalogue since 2003.

TECHNICAL DATA

AUTOMATION POWER SUPPLY	SINGLE-PHASE 230 Vac (+/- 10%)
MOTOR POWER SUPPLY	24 Vdc
TEMPERATURE	-10° +60° C
BATTERY CHARGER	BUILT-INTO WING NK CARD
AUTOMATIC DIAGNOSTIC	SEVERAL TYPES OF BUZZER ALARMS
ADJUSTABLE PARAMETERS:	APPROACH SPEED DURING OPENING AND CLOSING DOOR OPEN PAUSE TIME THRUST FORCE ELECTRIC LOCK ACTIVATION DELAY PARTIAL OPENING PERCENTAGE MASTER/SLAVE EMERGENCY OPENING PHOTOCELLS USED SETTINGS FOR TAMPERING, EMERGENCY OPENING, ELECTRIC LOCK AND POWER FAILURE

The Upgrade KIT allows all Aprimatic automatic door customers (Wing and Wing Evo series) to replace the basic components to adapt the "old" system to the new performance levels of the new WING NK series automation systems. The mechanical operations required for the replacement are extremely simple (the same bolts and component measurements are used) while the electronic operations are even simpler: just disconnect the old control unit and the peripheral units from the terminals and insert the new card. Once it is powered up, the new Wing NK control board will do all the rest: the new HIGH-TECH software requires no manual operations: it will automatically learn all the necessary settings (such as wing weights, etc.) and self-calibrate as efficiently as possible.

ITEM NUMBER	DESCRIPTION	€
42902/052	WING NK UPGRADE KIT The package includes: Gear motor unit, Wing NK control unit, idle pulley and fixing screws	1119,05

NOTA: All prices are subject to variation.

CONTROL AND SAFETY DEVICES

Stylish and functional design.

The key-operated selector units can be used to set and select 6 operating modes for automatic sliding doors. The SC6EC and SC6 WIRELESS key-operated selector units can be surface wall-mounted or flush-mounted in a standard 503 electrical box.

The Reset push-button on the key-operated selector unit is small and recessed to prevent accidental operation.

CONTROL AND SAFETY DEVICES			
	ITEM NUMBER	DESCRIPTION	€
	42282/078	SC6 WIRELESS - 6-way key-operated selector unit for setting standard functions, it operates by radio waves with a frequency of 433.92 MHz, installation: wall-mounted or flush-mounted with 503 box, PLUS SC6 WIRELESS receiver required	128,55
	42282/073	SC6EC - 6-way key-operated selector unit for standard function setting, installation: wall-mounted or flush-mounted in 503 box, 4-metre cable with connector	118,55
	41923/007	PLUS SC6 WIRELESS RECEIVER - Installation on NK beams requires the NK 250 mm profile, SC6 WIRELESS key-operated selector and/or TR2 or TR4 transmitter required	119,38
	42282/070	SC6 - 6-way key-operated selector unit for standard function setting installation: wall-mounted - 4-metre cable with connector	93,99
	41905/004	TM4 - 433.92 MHz four-channel remote control	38,41

PHOTOCELLS			
	ITEM NUMBER	DESCRIPTION	€
	42300/007	ER6/N - Self-aligning, miniaturised, modulated infrared photocells Range of 6 metres at full power and 3 metres at half power, the unit consists of: amplifier card for two pairs of photocells with self-test function (fault signal relay output) and twin-relay output with series-connected contacts, pair of transmitter/receiver photocells with 8-metre shielded cables, fittings for assembly on aluminium frames, installation on NK beams requires the NK 250 profile	143,96
	42300/002	ER6/N Pre-mounted NK (can be ordered only with the purchase of an automation system)	193,13
	42300/006	Kit of extra ER6/N photocells	42,8

NOTE: By ticking the appropriate box on the order form, the photocells ER6/N item No. 42300/002 will be supplied pre-assembled and pre-mounted on the beam at the same price.

NOTA: All prices are subject to variation.

CONTROL AND SAFETY DEVICES

RADAR

The range encompasses

all the technologies used for automatic door opening devices, such as microwave, active infrared and passive infrared.

RADAR

INSTALLATION ACCESSORIES

EMERGENCY PUSH-BUTTON

The emergency push-button enables door opening whenever necessary. It consists

of a highly-visible, red mushroom-head push-button with a twist-to-release action.

EMERGENCY PUSH-BUTTON			
	ITEM NUMBER	DESCRIPTION	€
	42282/082	PE - Red mushroom-head emergency push-button with twist-to-release action	54,23

ELECTRIC LOCK AND MANUAL RELEASE UNITS

The electric lock has been designed specifically for locking mobile wings. It is supplied complete with a diagnostics card. The system is not electrically powered when it is in the open or closed position.

The EB2 electric lock can be fitted (on request) with mechanical release systems which is used to release the lock in the event of an operating fault, a mains power failure or a backup battery failure.

A driven external release is also available. This is mounted inside a recessed, wall-mounted, lockable box to protect against unauthorised operation.

ELECTRIC LOCK and MANUAL RELEASE UNITS			
	ITEM NUMBER	DESCRIPTION	€
	42282/076	EB2 - Electric lock for two-handed wings, controlled from by an electronic card, with 0.9 m - 1.5 m - 2.5 m, cables, installed on Nk beams with NK 250 mm profile	184,93
	42282/077	EB2 NK PREM (for Slim SNK, Wing NK, Wing NK H150) (can be ordered only with the purchase of an automation system)	206,59
	42280/084	SME - Mechanical release system for EB2 electric lock, for use in the event of faults or power supply failures	66,71
	42280/085	Box for external release drive complete with cable and shield - 5 m	129,33
	41704/002	CS - Built-in strongbox (with up/down button and electrical brake release)	74,19
	41704/004	CSP - Wall mounted outdoor strongbox	61,43

NOTE: By ticking the appropriate box on the order form, the EB2 electric lock code 42282/077, will be supplied pre-assembled and pre-mounted on the beam at the same price.

NS 48

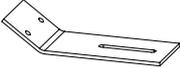

NS 48			
	ITEM NUMBER	DESCRIPTION	€
	42282/075	NS48 (battery units are pre-assembled on all automation systems). Battery unit with double function (charging and diagnostic functions built into the door control device): 1) Electrical emergency opening device 2) Backup battery (autonomy of 1 hour, half-charged)	131,67

NOTA: All prices are subject to variation.

INSTALLATION ACCESSORIES

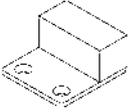

OPTIONAL ACCESSORIES FOR BEAMS AND COVERS

OPTIONAL ACCESSORIES FOR BEAMS AND COVERS			
	ITEM NUMBER	DESCRIPTION	€
	42910/008	Telescopic cover* with natural finish L=7,000 mm	15,00 /m
	42910/010	Telescopic cover* with black finish L=7,000 mm	31,24 /m
	42280/067	Cover fixing bracket, in pack of 10 pcs	46,45
	42910/003	Rear profile* with silver finish L=7,000 mm	50,9 /m
	42280/061	Sound-proofing seal for rear profile (1 m pack)	4,08

* All profiles are supplied in lengths of 7 m which cannot be split.

ACCESSORIES FOR WINGS WITH ALUMINIUM PROFILES

Floor guides for mobile wings.

ACCESSORIES FOR WINGS WITH ALUMINIUM PROFILES			
	ITEM NUMBER	DESCRIPTION	€
	42200/050	SPS - Floor guide set for wing with Small profile frame (Can be used with other types of aluminium profile)	17,02
	42201/051	SPT - Floor guide set for wing with Modular profile frame (Can be used with other types of aluminium profile)	12,08

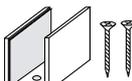

NOTA: All prices are subject to variation.

INSTALLATION ACCESSORIES

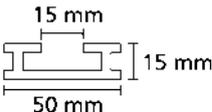

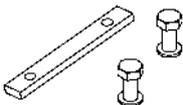

ACCESSORIES FOR GLASS WINGS

Details used exclusively for assembly of mobile glass-only wings (not framed with aluminium profiles).
The new system cuts assembly work to the minimum and facilitates working with glass panels.

ACCESSORIES FOR GLASS WINGS		ITEM NUMBER	DESCRIPTION	€
	42281/061	PCR - Clamps for glass doors, 3 m raw profile, For 10 mm tempered glass, max. weight 80 kg and max. wing width 1,500 mm	252,82	
	42281/062	Set of fixing accessories for glass wings	112,07	
	42281/063	Additional reinforcement bracket (no. 1 pc) 1 pcs for wing length 900/1200 mm 2 pcs for wing length 1200/1900 mm	20,63	
	42281/064	Plug for glass door clamp (no. 1 pc)	13,97	
	42280/079	GTC - Floor guide set for glass wings	7,6	

UNIVERSAL ACCESSORIES FOR OTHER TYPES OF WINGS

Useful accessories for rapidly fixing new or existing mobile wings to the carriages of APRIMATIC automatic doors.

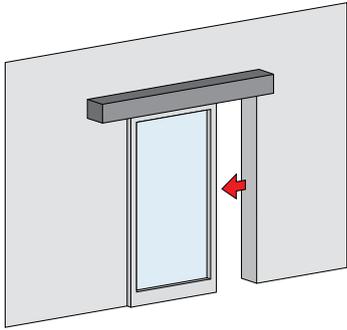

ACCESSORIES FOR WINGS WITH ALUMINIUM PROFILES		ITEM NUMBER	DESCRIPTION	€
	42280/077	PDA - Aluminium adapter profile (L=1500 mm) for one wing, for joining the carriages to the framed wing, connection plates required.	36,28	
	42280/071	CPA - Set of 2 connection plates for one wing, with fixing screws	9,52	
	42200/052	Set of fixing screws for a small wing, contains all necessary screws and fittings to fix the door wing to the automation system carriage	8,3	

NOTA: All prices are subject to variation.

EMERGENCY BREAK-OUT OPENING DEVICE

ASM-N MECHANICAL EMERGENCY BREAK-OUT OPENING DEVICE, FULL AND PARTIAL

**LAYOUT****The emergency break-out opening device**

is a safety device enabling mobile and semi-fixed wings of all types to be opened mechanically in the event of an emergency.

PARTIAL EMERGENCY OPENING DEVICE**FULL EMERGENCY OPENING DEVICE**

WARNING: In configurations where mobile wings equipped with ASM-N are joined to semi-fixed wings also equipped with emergency opening devices (full emergency opening device), it is necessary to fix the wings using the fittings supplied in the special set (optional).

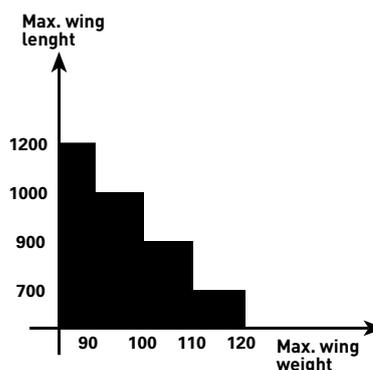

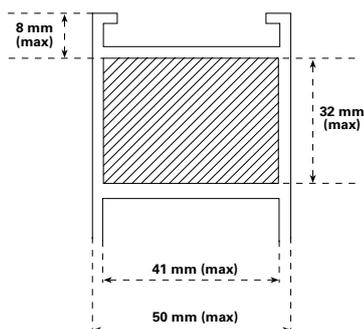

NEWS: The spinning point for mobile wings and semi-fixed wings is located inside the profile. The set of fittings for semi-fixed wings are not visible and located inside the covering profile.

The ASM-N mechanical emergency break-out opening device can be used on wings with a maximum width of 1,200 mm and max. weight of 90 kg; and on wings with

a minimal width of 700 mm and max. weight of 120 kg (according to the table below) for a max. height of 2,400 mm.

Wing length mm	900	1,000	1,200	90
Max. wing weight* kg	120	110	100	90
ASM-N weight	7 kg			

*Overall weight including ASM-N

**THE ASM-N CAN BE USED WITH THE FOLLOWING TYPES OF PROFILES:**

**PROFILES
COMPATIBLE
WITH ASM-N
(NOT TYPE-
APPROVED)**

- Domalstopper PG
- Formula F40 system
- Metra NC 45 International
- Metra NC 55 International
- R50
- Modular APRIMATIC profiles*

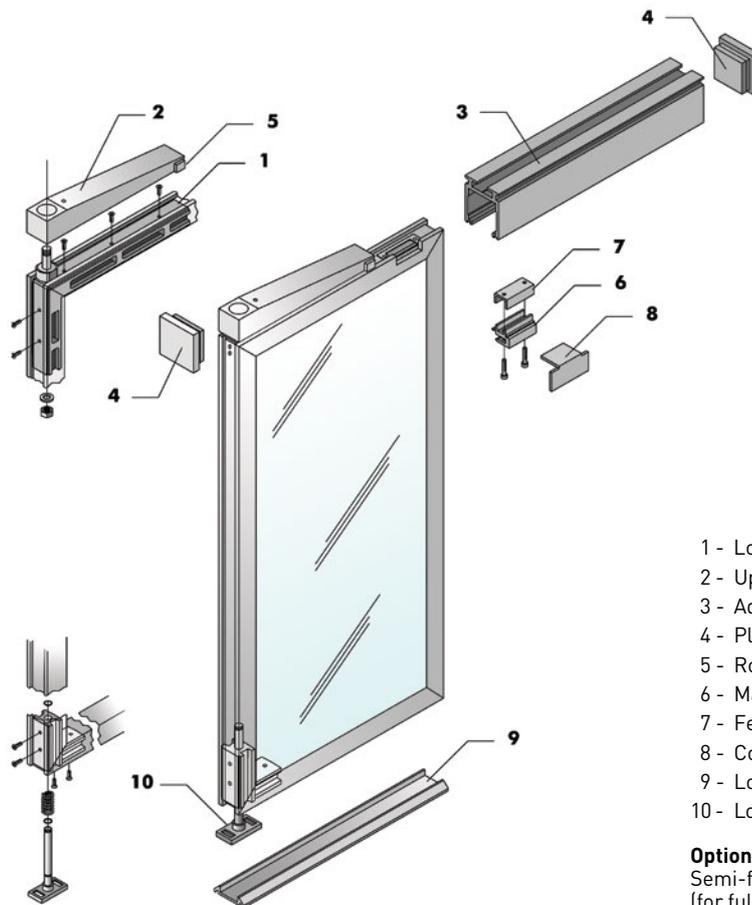

If you cannot use the compatible profiles listed above, ensure that the profiles you use have the dimensions indicated above.

* For instructions on machining "Modular" profiles, request the cutting list.

EMERGENCY BREAK-OUT OPENING DEVICE

ASM-N EMERGENCY OPENING DEVICE

Optional elements:
Semi-fixed wing fitting set
(for full emergency opening device)

MECHANICAL EMERGENCY BREAK-OUT OPENING DEVICE

MECHANICAL EMERGENCY BREAK-OUT OPENING DEVICE		
ITEM NUMBER	DESCRIPTION	€
42280/088	(*) Mechanical emergency opening device set for 1 mobile wing, device weight 7 kg	338,28
42280/081	(*) Guide (L=1,500 mm) and adapter (L=1,200 mm) set	76,07
42280/070	Set of fittings for 1 semi-fixed wing	122,72

NOTE: You should include the weight of the emergency opening device when calculating the wing weight. Max. wing weight = 90 kg for a length of 1,200 mm, including the emergency opener system (7 kg). (*) Both required for installation.

ACCESSORIES FOR MECHANICAL EMERGENCY BREAK-OUT OPENING DEVICE

ACCESSORIES USED TO STOP WING MOVEMENT IN THE EVENT OF EMERGENCY OPENING

OPTIONAL ACCESSORIES		
ITEM NUMBER	DESCRIPTION	€
42280/076	SMI - Magnetic lock sensor, recess mounted, to be connected as an N.C. contact in series with the reset button, on full emergency break-out opening devices, to be fitted on all semi-fixed wings	10,13
42280/075	SMS - Magnetic lock sensor, surface mounted, to be connected as an N.C. contact in series with the reset button, on full emergency break-out opening devices to be fitted on all semi-fixed wings	11,58
42300/007	ER6/N	143,96

NOTE: For technical details about the ER6N photocells, see the "Photocells" table (on "Control and safety devices" page).

NOTA: All prices are subject to variation.

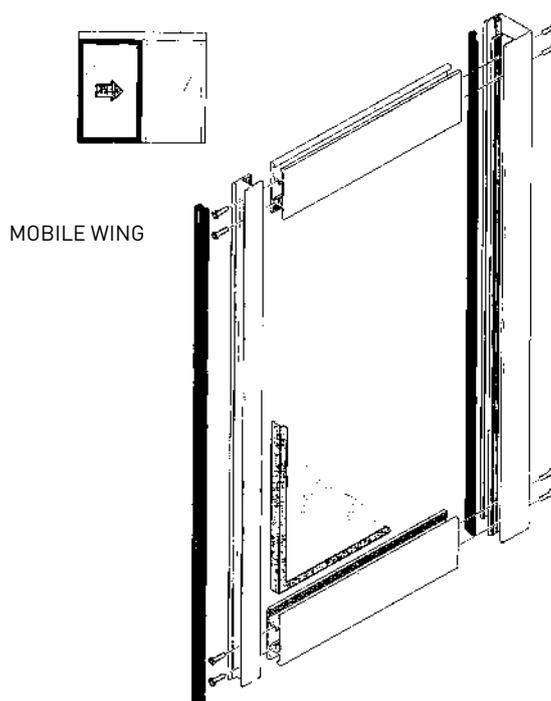

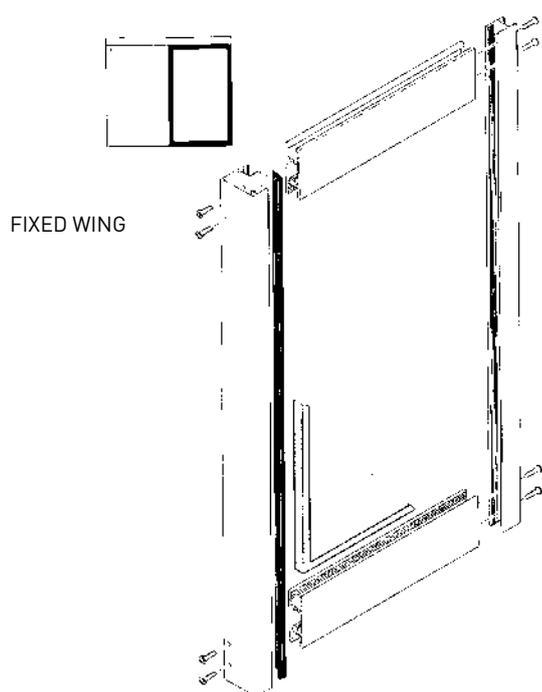

SMALL PROFILES

PROFILES FOR AUTOMATIC DOORS SUITABLE FOR 10/11 MM THICK GLASS PANELS

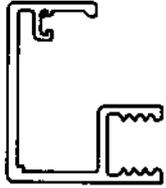

"SMALL" series profiles **can be used to make wings** for automatic sliding doors. This profile has been designed and manufactured specifically for mobile wings, fixed side wings and semi-fixed side wings. In spite of its compact size, the profile is compatible with up to 10 mm thick glass panels.

EXAMPLE OF ONE OF THE POSSIBLE CONFIGURATIONS

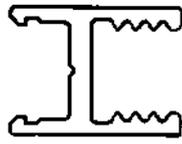

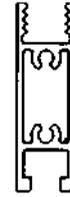

"SMALL" SERIES PROFILES

Fixed/mobile wing upright

Central upright

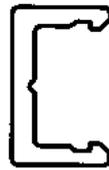

Top and bottom rail

Single wing stop

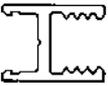

Central seal

Draught-proof seal
for overlap area

Side seal

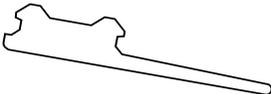

NOTE: All aluminium profiles are supplied non-anodised in lengths of 5050 mm.

"SMALL" SERIES PROFILES

	ITEM NUMBER	DESCRIPTION	€
	42200/012	"Small" mobile/fixed wing upright (srm)	70,22
	42200/013	"Small" central upright (L = 5050 mm)	37,45
	42200/014	"Small" top and bottom rail (L = 5050 mm)	87,2
	42200/015	"Small" single wing stop (L = 5050 mm)	22,23

NOTA: All prices are subject to variation.

**"SMALL" SERIES PROFILES**

SEALS			
	ITEM NUMBER	DESCRIPTION	€
		"Small" central seal (pack of 100 m)	4,89 /m
	42281/060	Draught-proof seal for overlap area (pack of 1 m)	4,08 /m
	42200/054	"Small" side seal (pack of 80 m)	7,6 /m

NOTE: All seals necessary for wing assembly can be purchased to size in multiples of 1 metre.
This does not apply to adhesive seals; which are sold exclusively in packs of 50 metres.

FITTING ACCESSORIES			
	ITEM NUMBER	DESCRIPTION	€
	42200/053	Set of fixing screws for a small wing, required for assembly of automatic door wing profiles	5,26
	42200/051	Pack of inserts for assembling a fixed wing with "Small" profile	24,57

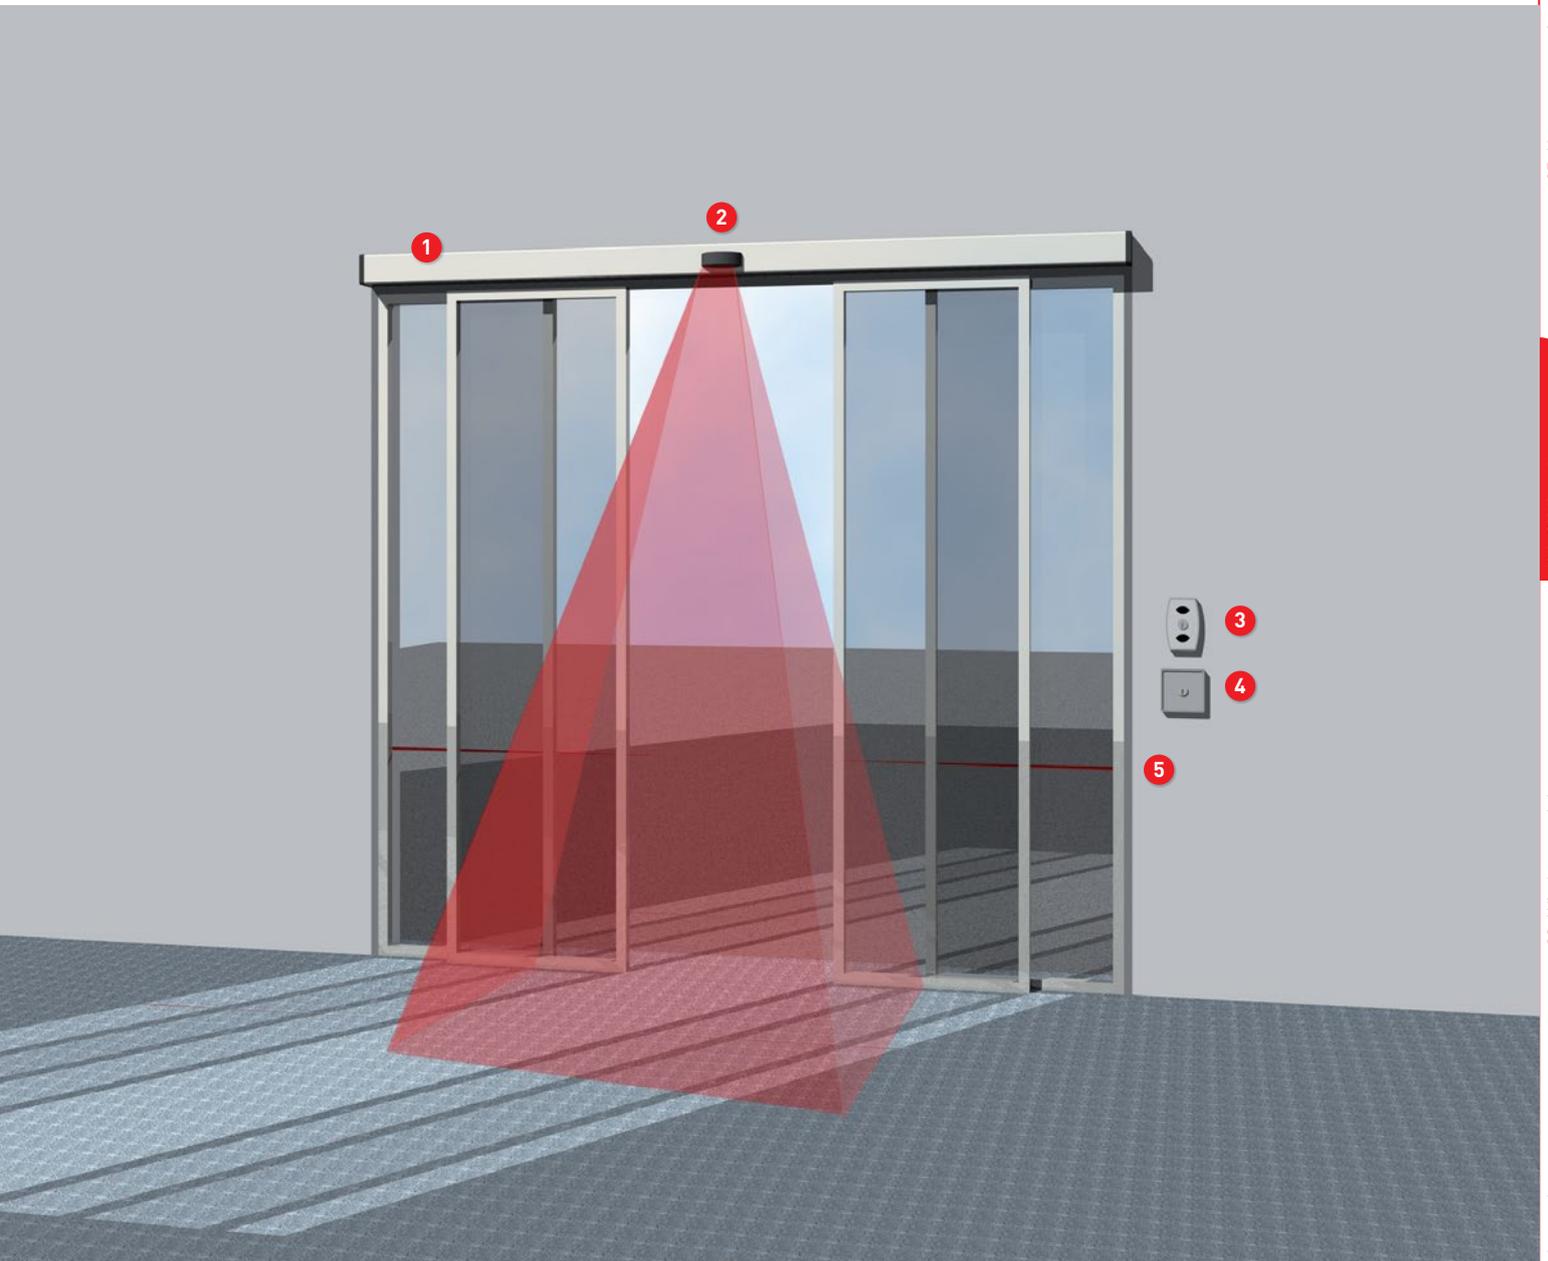

NOTE: For the fittings required to secure the mobile wing to the carriage and for the floor guide to be used with Small profiles, see the catalogue on page 186-187 (SPM and "Set of fixing screws for a small wing").

MODULAR PROFILES

PROFILES FOR 9/13 mm AND 20/23 mm automatic doors

"MODULAR" profiles CAN be used for automatic sliding door wings. This profile has been specifically designed for the construction of fixed and mobile wings with or without mechanical emergency

break-out opening device (AMS) thus perfectly fitting in a system of windows and curtain walls providing a complete range of possible solutions. The profile's modular construction, lends the wing a striking and aesthetically

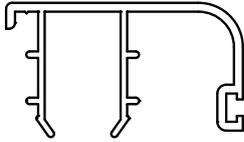

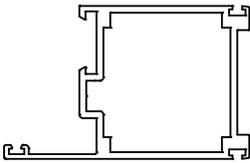

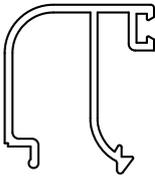

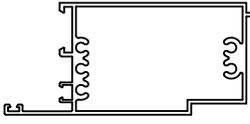

pleasing look. "MODULAR" profiles complete the range of extruded wing elements and meet any installation requirements.

OPENING ANGLE		100° max.	
OBSTACLE DETECTION		YES adjustable	
MAX. SPEED OPENING		2-6 s	
OPERATING TEMPERATURE		- 15° C / + 50° C	
EMERGENCY BATTERY		YES optional	
PROTECTION DEGREE		IP20	
CERTIFIED		EN16005	

OVER series, is equipped with encoder, a device through which you can control and manage with the utmost precision the engine and the port status in any use condition.

Maximum safety is guaranteed by OVER's many functions. The **OBSTACLE DETECTION** function, available thanks to the encoder, stops the door and/or reverses the wing movement direction when an obstacle is detected.

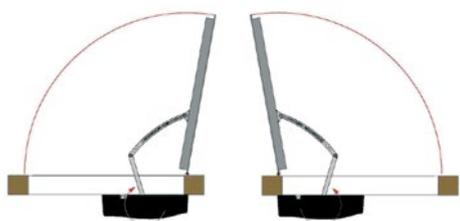

EMERGENCY opening mode, in case of a power failure, which allows the automation system to place the door in the OPEN position and STOP condition or, at the discretion of the user, allows the continuous operation of the door thanks to the optional backup battery.

The PUSH&GO function enables OVER to recognise when the door is being pushed by hand and therefore allow door opening.

OVER and OVER HEAVY are available with opening and closing to motor; while OVER EVO with opening at motor and closing with spring, guarantee a safety closing also in blackout situation.

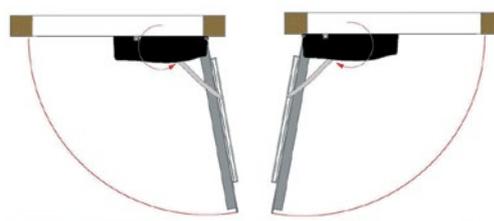

New technology brushless motor for greater durability, reducing the frequency of maintenance.

ARTICULATED ARM

Use the ARTICULATED ARM for door opening outwards from the automation side.

SLIDING ARM

Use the SLIDING ARM for doors opening inwards from the automation side.

ADI

ADI

4-module flush-mounting box

ADI MODULES - MOTOR CONTROL

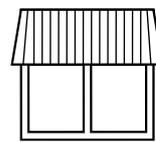

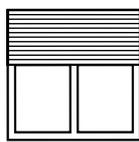

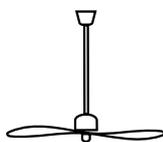

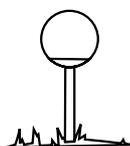

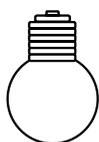

Radio-controlled equipment for the automation of door, window and shutter motors, lights, fans, solenoid valves, small domestic loads with 230 Vac power supply.

Cost-effective solutions for the most common automation needs in the residential and service sectors (homes, offices, shops, hotels, etc.).

The indoor modules can also be installed in 4-module flush-mounting boxes, using the appropriate fixing tabs.

Suitable for systems with different levels of complexity: from individual automation systems to coordinated systems.

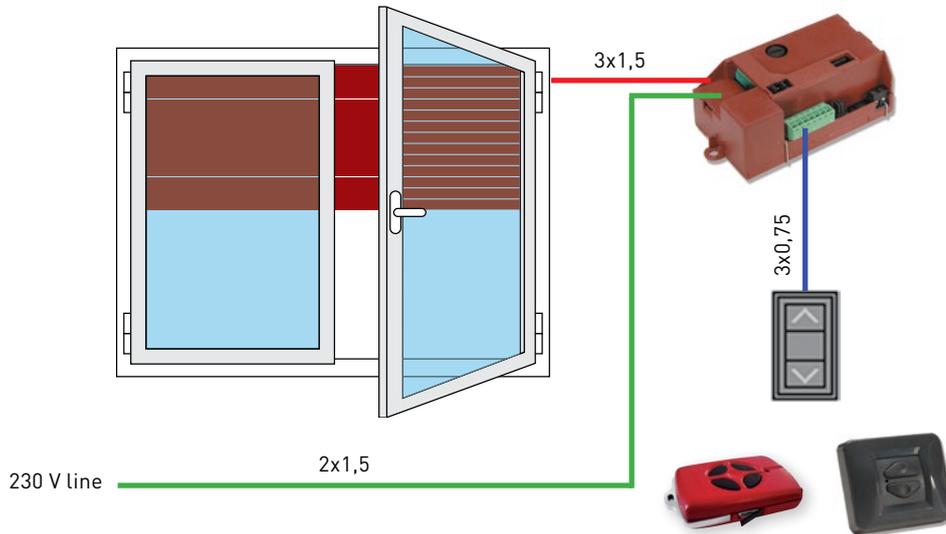

Ease of installation and commissioning, built-in antenna. Wired and wireless centralised operation.

ADI MODULES - MOTOR CONTROL

INDIVIDUAL RADIO CONTROL: M230HR

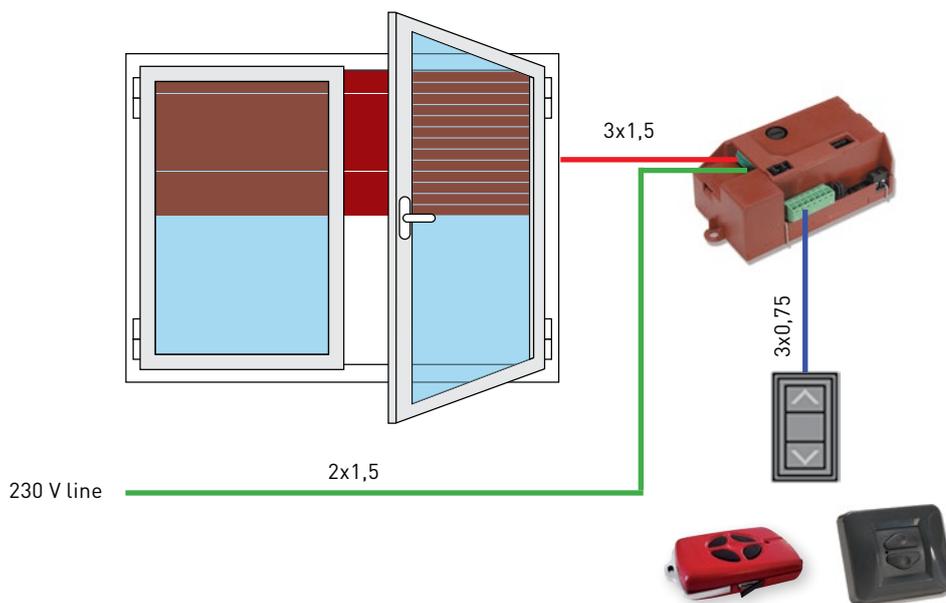

Radio control with portable two-channel transmitters (TM4) or wall-mounted transmitters (TP2-BN, TP2-NR).

INDIVIDUAL WIRED AND WIRELESS CONTROLS: M230HR

Individual low-voltage wired control with standard, even pre-existing, push-buttons and radio control with portable

two-channel transmitters (TM4) or wall-mounted transmitters (TP2-BN, TP2-NR).

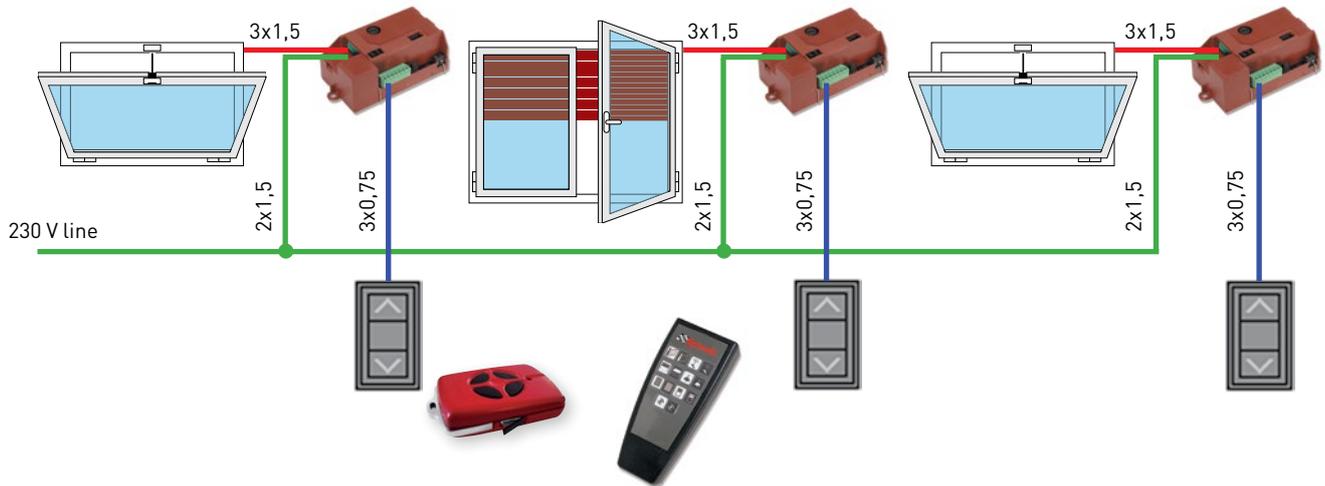

ADI MODULES - MOTOR CONTROL

INDIVIDUAL WIRED AND MULTIPLE WIRELESS CONTROLS: M230HR

Individual low-voltage wired control with standard, even existing push-buttons and wireless control with portable

multichannel transmitters (TM4, TR14). Simple configuration allows all modules to be controlled from a single remote control.

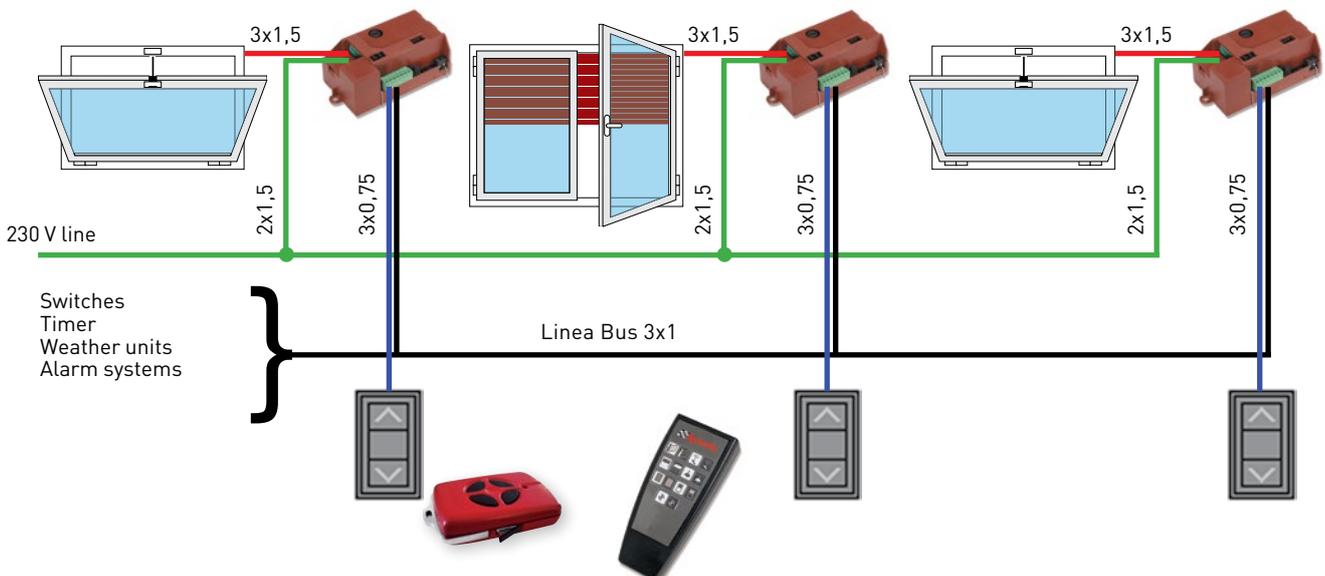

CENTRALISED WIRED AND WIRELESS CONTROLS: M230HR

Indoor modules can receive individual controls and centralised priority wired controls. Such controls can come from timers, weather units, alarm systems etc. as well as from simple manually-operated switches. Priority centralised controls take precedence over local controls as long as

they remain active or until the end of the operation. Priority centralised controls can be used to create simple but effective coordinated control "scenarios": for instance, in an office, with a single pulse control it is possible to implement an "exit" scenario that provides for the closing of all windows and turning off of all lights.

The same functions can be achieved with wireless controls, simply by configuring the control modules. For example a TR14 remote control can be used to control "scenarios" as well as controlling individual operators.

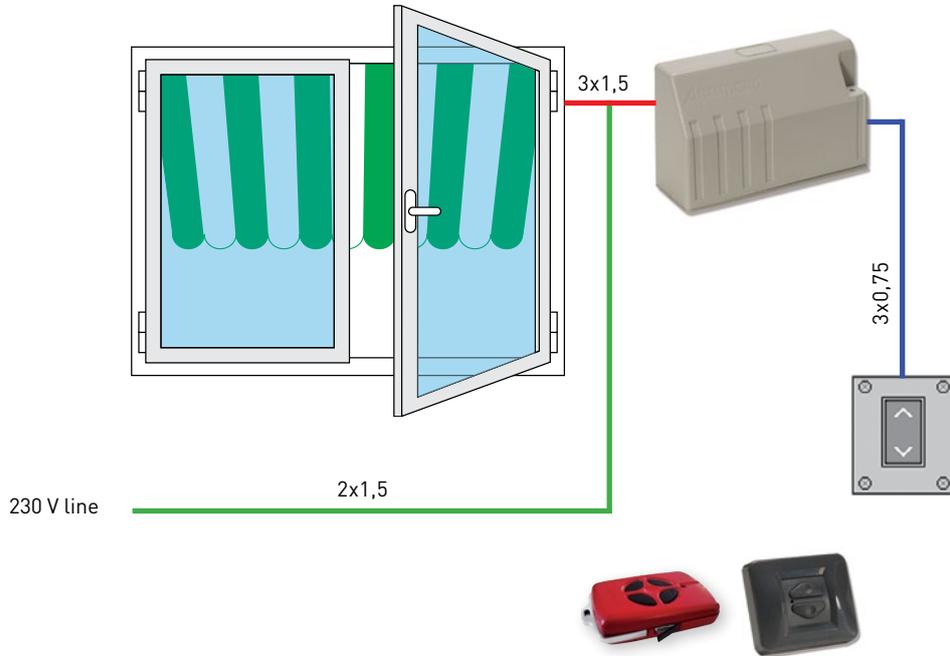

ADI MODULES - MOTOR CONTROL

INDIVIDUAL WIRED AND WIRELESS CONTROL: M230S

Low-voltage wired control with standard outdoor push-button and wireless control with portable two-channel transmitters

(TM4) or wall-mounted transmitters (TP2-BN, TP2-NR).

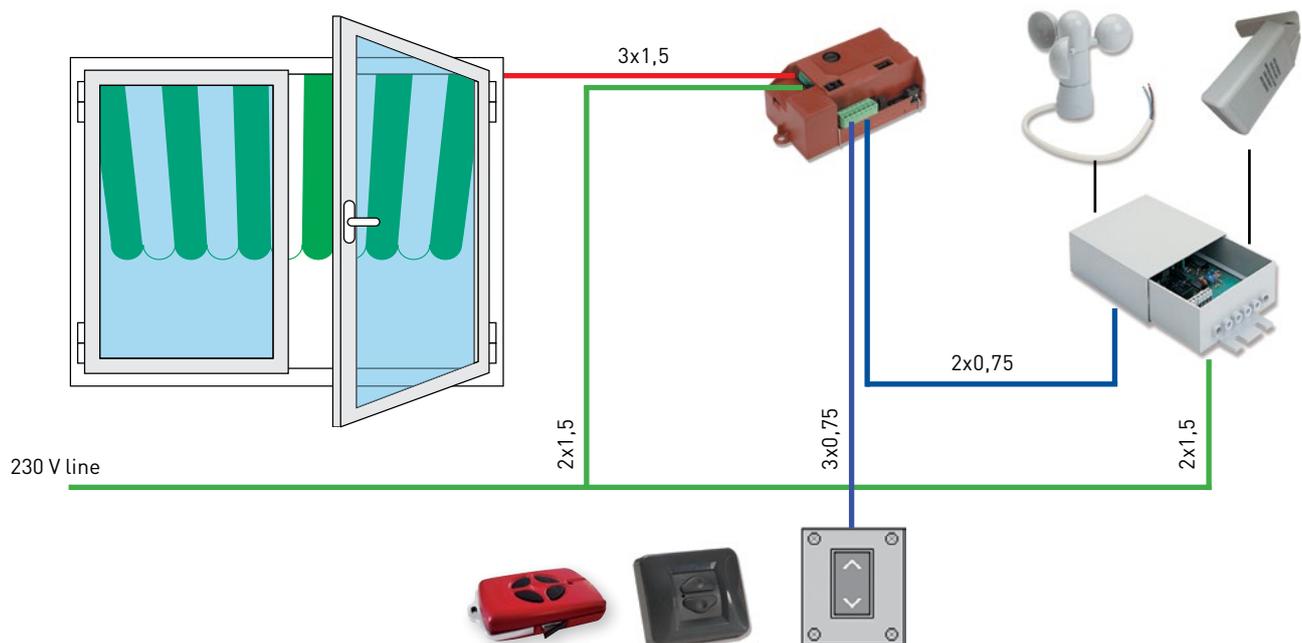

USE WITH WEATHER UNIT: M230HR

Automatic closing control from a weather unit on dedicated priority input.

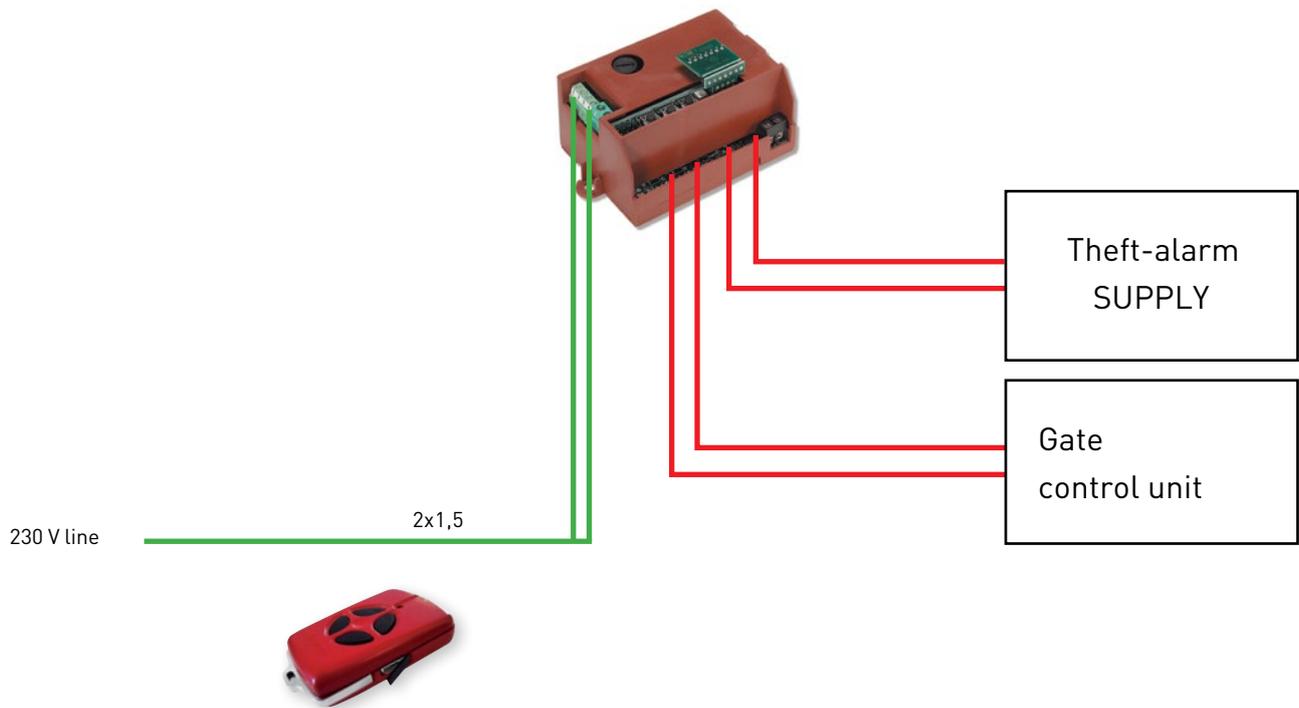

Low-voltage wired control with standard outdoor switch and wireless control with portable two-channel transmitters (TM4)

or wall-mounted transmitters (TP2-BN, TP2-NR).

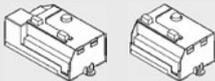

ADI MODULES - RX230 RECEIVER MODULE

2-channel receiver module with 2 clean contacts for controlling low-voltage loads or pulse control for gate control units, theft-alarm etc.

ADI MODULES - MOTOR CONTROL

MOTOR CONTROL UNITS, WEATHER UNITS AND ACCESSORIES

MOTOR CONTROL UNITS			
	ITEM NUMBER	DESCRIPTION	€
	43660/002	CV1N - 24 Vdc max. 1A motor control unit, inputs for local and centralised opening and closing commands, power adjustment potentiometer 300 mA to 600 mA, 24 Vdc accessory power supply, can be connected in parallel with other CV1N units	253,66
	43660/007	CV10 - 24 Vdc max. 8A motor control unit, inputs for local and centralised opening and closing commands, can be connected in parallel with other CV10 units	165,98
	43645/005	4M - control unit for simultaneous control of four 230 Vac motors, inputs for local and centralised opening and closing commands, can be connected in parallel with other 4M units	214,91
	43660/006	CF10/2 - motor control unit (up to ten 24 Vdc max. 8A motors), 24Vdc max. 500 mA accessory power supply output, preset for backup battery and recharge circuit, built-in control panel for operators, rain/wind sensor and thermostat management, indicator LEDs, internal emergency thermostat triggered at +70° C, 2.2 KOhm balance line for max. 24 smoke and heat detectors, remote alarm signalling output	485,16
ACCESSORIES - CF 10/2			
	ITEM NUMBER	DESCRIPTION	€
	43660/101	CF10/2 - Backup battery (no.2 x 12V - 5Ah batteries)	173,56
	43701/063	RFC - Optical smoke detector with differential heat sensor, compliant with EN54 standards (for max. area 60 m2 and height 12 m)	195,69
WEATHER UNITS AND SENSORS			
	ITEM NUMBER	DESCRIPTION	€
	43665/018	PV1 (power supply 230 Vac)	74,55
	43660/008	PV2 (power supply 24 Vdc)	67,55
	PV1 and PV2 weather units can be connected to an anemometer and/or rain sensor to provide an alarm signal output (normally-open relay with no-voltage contacts) that can be used to send closing commands		
	43701/055	RV - Anemometer	42,51
	43701/052	SP1 - Rain sensor	84,44

NOTE: All prices are subject to variation.

REGULATIONS

We hereby declare that all operators and control units are compliant with the regulations: 2004/108/EC (EMC) directive replacing the previous 89/336/EEC 2006/95/EC (LVD) directive

replacing the previous 73/23/EEC. The Aprimatic Memory System remote controls and receivers in this catalogue have passed the tests set by European regulations: 1999/5/EC directive (R & TTE).

KEY TO PRODUCT VERSIONS

Description of application fields:

- R RESIDENTIAL:** Doors and gates to be motorised typically of limited weight and size, with few daily operations. (E.g., detached/semi-detached houses).
- C CONDOMINIUM:** Doors and gates to be motorised with medium/high frequency of operations per day. (Ex. Medium users, apartments).
- I INDUSTRIAL:** Doors and gates of considerable weight and bulk to be motorised. (Ex. Industrial buildings, car parks).

ADOPTED SYMBOLS

	Motor supply		Protection degree		Information sheet
	Condominium double wing		Memory System		Catalogue page
	Residential double wing		Gate wing weight		
	Condominium sliding		Anti-crushing safety		
	Residential up-and-over		Compliant with EN 12453 standards par. 5.1.1.5 on force limitation		
	Residential single wing		TÜV certification		
	Maximum length per leaf				

SPECIAL SYMBOLS

New item on the catalogue.

Special item.
(please contact the customer service to verify product availability)

Automation systems for swing gates, up-and-over doors and traffic barriers:

- | | |
|---|--|
| <p>A With hydraulic lock valve on opening only, in the closed position the electric lock is required.</p> <p>B With hydraulic lock valve on opening and closing, it does not require any electric lock. In case of electromechanical operator, it indicates the self-locking model.</p> <p>C With hydraulic lock valve on closing only. Does not require the electric lock in closing position.</p> <p>SF Without hydraulic lock valve, when manually pushing the gate/door moves slowly as if it was braked (F). Electric lock required.</p> | <p>SR Similar to the SF model, but when manually pushing the gate/door moves freely as if it lacked an automation system. Electric lock required.</p> <p>DS Hydraulic operator with hydraulic braking on both closing and opening.</p> <p>RF Hydraulic operator with flow adjustment valve that allows to obtain a linear movement of the gate/door, also with unbalanced load and high initial weight.</p> |
|---|--|

Automation systems for sliding gates:

- Z16** Module 4 16-teeth pinion. Slow. Heavy gates.
- Z20** Module 4 20-teeth pinion. Fast. Light gates.
- C** 16-teeth pinion preset for chain drive.
- E** Electronic control unit on board of the gear motor.

Control devices:

- TR:** Two - or four-channel transmitter. Rolling Code.
- TG:** Two - or four-channel transmitter. Quartz - Dip Switches.

GENERAL SALES CONDITIONS

GENERAL

The general conditions of sale, as reported below, are understood to be valid for any order received by Aprimatic s.r.l. and are an essential part of each order. Any modifications to these clauses, as well as any special conditions, shall be expressly agreed upon in writing. Orders are only supplied in the packaging format indicated on the price list.

ORDERS

Orders acquired by our sale organisation are subject to the approval of Aprimatic s.r.l.. Orders should comply with the packing as reported in the price list and their net amount may not be lower than € 150.00.

TRANSPORT

The goods shall travel at the Purchaser's own risk; before collection he/she shall verify, in his/her own interest, the integrity of the packages and the quantity of the goods received. Any complaint shall be made directly to the carrier upon delivery. Delivery EXW Incoterms ICC2000 unless otherwise agreed in writing. All delivery dates given shall be deemed as purely indicative and non-binding. Aprimatic s.r.l. shall not be held responsible to the Purchaser for any failure to perform, including late delivery or failure to deliver, which failure to perform is caused by occurrences beyond Aprimatic's reasonable control or in any case caused by an event of force majeure, including, but not limited to, late delivery of non-delivery of material by suppliers, strikes, and other trade union actions, terrorist activities, suspension of electrical energy or difficulties in transportation.

DELIVERIES

The goods are meant to be delivered ex our factory in Turin or our external warehouses, if the net amount of the order exceeds € 400.00 for EU country and € 600.00 for Extra EU country. For orders less than the net amounts of € 400.00 for EU country will be applied on the amount of order € 40 of transport, and for order less than € 600.00 for extra EU country will be apply on the amount of order € 50 for transport. The terms of delivery are just an indication and have no contractual value.

PRICES

All listed prices are understood to be before VAT. Aprimatic s.r.l., reserves its unquestionable power to modify published list prices if this is required by the cost components of the individual items. The prices indicated on the Price List are not binding. Aprimatic s.r.l. reserves the right to change the price of the Products and/or the discounts, if any, applicable thereto at any time and for any reason, upon 30 (thirty) days' prior written notice to the Purchaser. If any delay in delivery of the Products occurs through the fault of the Purchaser, any possible increase in the price of the Products which may have occurred since the confirmation of the order relating to the Products shall be borne solely by the Purchaser. Any and all taxes, duties, levies, licenses, authorizations, permits and any and all tax and administrative formalities relating to import and/or resale of the Products shall be borne and carried out exclusively by the Purchaser.

RETURNS AND CLAIMS

Any complaints must be sent to Aprimatic s.r.l. in writing within 8 days of receiving of the goods. Returns must be authorised beforehand by Aprimatic s.r.l. Authorized returns must be sent carriage paid to the Aprimatic s.r.l. warehouse with the purchase documents, delivery note and number of authorization enclosed. It will be issued a credit note for the purchase price of the goods minus 20% due to processing fee and testing procedures. Regarding the returns and claims, you can see and downloading the current "conditions" on our website www.aprimatic.com

PRODUCTS

Aprimatic s.r.l. shall be entitled to make minor changes to the Products, without being obliged to inform the Purchaser. The information shown in all Aprimatic publications is provided for information purposes only and is subject to modification at any time without prior warning. Aprimatic s.r.l. does not warrant to the Purchaser that the Products comply with the applicable laws and regulations in force in the country (ies) where the Purchaser is established or where the Products are meant to be sold, delivered and/or installed. Aprimatic shall have no obligation to modify the Products in compliance with said laws or regulations and the Purchaser shall be solely responsible for ensuring that the Products and any service of the Purchaser conform to the applicable technical and safety standards, laws and regulations in force in said country (ies). The Purchaser acknowledges that the Products may be dangerous to persons or property when not installed or used in strict compliance with Aprimatic's written instructions for installation and used furnished by Aprimatic and with the safety requirements specified in the EN 12445 and EN 12543. Aprimatic s.r.l. expressly disclaim liability for any personal injury or property damage resulting from installation or use of the Products, other than in strict compliance with Aprimatic's written instructions with respect to installation and use, or from installation or use of the Products together with

safety accessories or other products not manufactured by Aprimatic, it being understood that the maximum liability of Aprimatic to the Purchaser or to any other person or entity, arising out of or in connection with the Products and based on a claim of breach or under warranty, shall in no case exceed the price paid to Aprimatic for the Products which gives rise to the claim, loss or damage. In no event shall Aprimatic s.r.l. be liable for special and consequential damages, including, without limitation, loss of profit.

PAYMENTS

Payments shall be made to Aprimatic s.r.l. within the agreed term and for the agreed amount. Any delay in the payment of invoices beyond the terms agreed upon triggers the immediate application of bank interest and entails the ensuing suspension of deliveries.

WARRANTIES

Sold goods are guaranteed against manufacturing defects and/or defects of materials for 24 months from the date of installation certified by sending Aprimatic s.r.l., the "Warranty Certificate" for the products provided with it. Exception is made for the products of the Racing Kit line, whose warranty has a 36-month duration from the installation date as certified by sending said certificate. In order for the warranty certificate to be considered valid, it must be sent within 10 days from the date of installation and filled in all its parts. Alternatively, and for the products that are not provided with such a certificate, the warranty shall have a duration of 30 months from the date of production. The warranty terms and conditions are verified by Aprimatic s.r.l. under its final judgment and by the Repair centres it has put in charge of it. The costs of any calling and servicing rights are to the Purchaser's charge. Aprimatic s.r.l. reserves the right not to provide warranty if the powering of the plant is not entirely realised with APRIMATIC products and the installation is not made up to standard. The warranty shall not be in force when operation defects depend on structural flaws, i.e. incompatibility, of the frames to be powered with APRIMATIC products.

The material recognised in warranty shall be accepted for repair only if shipped free port; after the repair or replacement it shall be shipped back freight forward. The replaced material shall remain property of APRIMATIC. The warranty does not include:

- Breakdown or damages caused by transport.
- Breakdown or damages caused by faults in the electrical system and/or carelessness, negligence in using plant and in any case of misuse.
- Breakdown or damages due to tampering or any negligent behaviours or behaviours not conforming with standards by the installer or purchaser without conforming to instructions provided by the manufacturer.
- Breakdown or damages due to use of non-original spare parts.
- Defects caused by chemical agents or atmospheric conditions.
- Consumables.
- Interventions for supposed faults or convenient verifications.

Aprimatic s.r.l. guarantees exclusively the conformity of the Products to the technical specifications submitted to Buyer and published on the web site www.aprimatic.com, provided that the Products have been correctly transported, stored, installed, used and repaired by Buyer (including in compliance with the Aprimatic's manual); in case of defects, purchaser shall write a "reserve" on the delivery note and give a detailed notice thereof in writing to Aprimatic within 7 days from delivery or from discovery, in case of hidden defects and anyhow not later than two years from delivery and Aprimatic shall only be bound to, at its own choice: replace the defective Products or, totally or partially, reimburse their price. Apart from what set forth herewith, Aprimatic shall bear no other responsibility, in particular any liability for damages (including loss of profit or any other subsequent loss) here by expressly excluded.

OWNERSHIP OF GOODS

Aprimatic s.r.l. remains the owner of the goods until their complete payment by the customer. If the seller does not intend to repossess goods for which payment has not been made in full, the seller shall have the right to apply interest charges at a rate of 5% more than the current discount rate.

GENERAL RECOMMENDATIONS

This price list cancels and replaces all previous price lists. In accordance with current safety standards, it is essential to install genuine APRIMATIC control units and accessories. Aprimatic s.r.l. declines all responsibility for injury or damage, even to third parties, deriving from failure to observe these safety standards or from bad craftsmanship in the installation or operation of the goods.

COMPETENT COURT

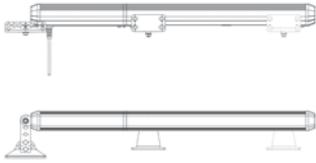

For any dispute that might arise, the competent court is understood to be the Court of Turin, Italy.
