

# MULTI-STAGE VACUUM GENERATORS PVP 25 MDX / MDXLP ÷ PVP 75 MDX / MDXLP

This line of generators is available with suction rates between 20 and 103 m<sup>3</sup>/h. The supply pressure goes from 4-6 bar for MDX items and from 1-3 bar for MDXLP items. The maximum level of vacuum is -90 KPa. Characterised by their new generation of ejectors, boasting an excellent ratio between the quantity of air consumed and that suctioned, benefiting operational consumption. They are fully made with anodised aluminium, with stainless steel ejectors and screws. The tightness seal is made from EPDM, while the reed valves are made as standard and in VITON®, upon request. The "free-flow" SSX high sound damping silencers installed as standard on the air exhaust.

They are equipped with additional threaded connections for increased points of usage or for the installation of measurement or control tools. Upon request, can be supplied with a compressed air energy savings kit ES (ENERGY SAVING SYSTEM), composed of a pneumatic vacuum regulator, a pneumatic coaxial shutter supply valve, a check valve and necessary tubing.

P=COMPRESSED AIR CONNECTION      R=EXHAUST      U=VACUUM CONNECTION

Note: All vacuum values indicated in the table are valid at the normal atmospheric pressure of 1013 mbar and obtained with a constant supply pressure.

Vacuum generator supply must be carried out with non-lubricated compressed air, 5 micron filtration, in accordance with standard ISO 8573-1 class 4.

Transformation ratio: N (newton) = Kg x 9.81 (force of gravity)

$$\text{inch} = \frac{\text{mm}}{25.4}; \text{ pounds} = \frac{\text{g}}{453.6} = \frac{\text{Kg}}{0.4536}$$

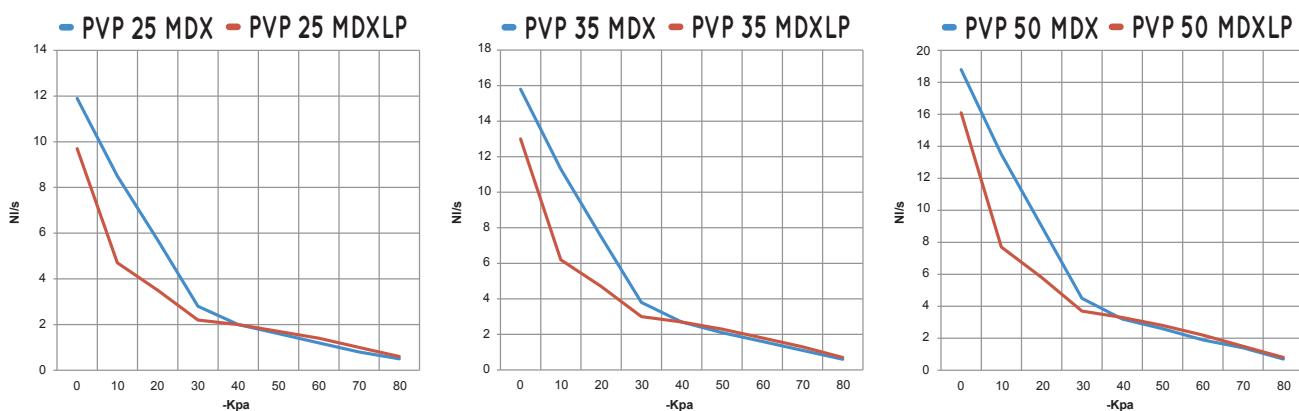

Adapters for GAS - NPT threading available on page 1.130
