Synthesis

Inverter

Synthesis combines the best features of price effectiveness, compactness and versatility currently available on stand alone inverters. Easy to install and program, in a limited number of parameters it features the most important functions required from this type of AC drive.

Especially suitable for APPLICATIONS such as CONVEYOR BELTS, PUMPS, SCREW CONVEYORS, MIXERS, STIRRERS, it is also available in the IP65 (NEMA 4) version for installation off the cabinet and on board the machine.

Synthesis drives are available with ratings up to 2.2 kW. Power supplies are either single phase 220 V and 110 V or three phase 220 V and 400 V. As standard, the drive come complete with built-in class A EMI filter and meets all major world standards.
